

Happy Vibes Info

Why we created HAPPY Vibes:

Personal mental health initiatives are a common New Year's Resolution. Mood enhancers, mushrooms and other alternative methods are often used to assist in balancing mental stability. You'll notice the addition of these ingredients rapidly growing in the supplement, food and beverage industry. We tried a few of the top sellers out there and agreed on a few things: 1. They taste terrible. 2. Due to the flavor, you have to craft the beverage around the additive. 3. The mood elevation was not effective or even noticeable at times. So, we hit the lab and combined some of our favorites from the plant kingdom that work together to help you find *your* HAPPY place.

What makes HAPPY special:

HAPPY Vibes is a concentrate. One ounce is a single serving. Now each person is different of course, even an individual person can have a varying experience from day to day. Maybe you're just slightly bogged down and need a pep in your step, or the 2 o'clock feeling is getting the best of you. Let HAPPY put some wind in your sails and guide you safely over the horizon. One serving could do the trick, or you may try an additional serving.

Easy to use:

Our one ounce pumps make portioning the doses a breeze. HAPPY Vibes concentrate has been designed to blend seamlessly into any drink. Instead of having to build your drink around a drink enhancer, you can focus on the taste of your beverage first without worrying about any flavor pairing or drink dilution.

Shelf stable:

This Energy Elixir can be stored right on your countertop, saving you valuable fridge real estate. Easy counter access makes for quicker service allowing you to pump, mix and deliver efficiently to your customers.

Pharmaceutical grade plant extracts:

A careful combination of L-Theanine, Ashwagandha, Caffeine, Adhatoda Vasica, Griffonia extract, B12, and Huperzine A creates an entourage effect that delivers a mood elevation to help you maintain balance throughout your day.

Ingredients Explained:

HAPPY - a concentrated blend of road trip songs, sunsets, winks and best buds to add to any drink

- Filtered water - only the the best out there
- L-Theanine - known to assist in stress reduction, improve mood and can switch your brain wave pattern into an alpha state
- Ashwagandha extract - reduces stress and is a powerful adaptogen especially combined with L-Theanine for anxiety relief
- Caffeine - 20 mg derived from green tea
- Citric acid - preservative
- Adhatoda Vasica - has roots in Ayurvedic medicine where it is widely used as bronchodilator (it helps you breathe)
- Griffonia extract (5-HTP) - a serotonin precursor that can/may have positive effects with sleep, mood, anxiety and pain sensation.
- B12 (as Cyanocobalamin) - support for mood and energy
- Potassium Sorbate - preservative
- Sodium Benzoate - preservative
- Huperzine A - an extract from Club moss used in ancient Chinese medicine. Helps increase dopamine and is widely used for memory and cognitive disorders.

Happy Vibes Concentrate Data Sheet
