

## Moxie Vibes Info

### **Why we created MOXIE Vibes:**

At Maya Tea we know that everyone operates on different gears from one another. A single person can carry themselves on various energy levels daily or even hourly depending on tons of factors. We started Vibes with CHILL, HAPPY and FOCUS but others needed something with more fire. That's why we brought **MOXIE** aboard our Energy Elixir lineup. This concentrate contains 75mg of caffeine in a single serving. We made sure to keep your daily dose of B12 and L-theanine to help you coast back to a leveled wavelength once the buzz is through.

### **What makes MOXIE special:**

**MOXIE** Vibes is a concentrate. One ounce is a single serving. At 75mg of caffeine this concentrate packs a harder punch than its counterparts. We use caffeine derived naturally from green tea. Despite the high level of caffeine, **MOXIE** is still undetectable by taste or smell when mixed into a curated drink. When someone needs a massive lift for their day, **MOXIE** is here to put the pep in their step.

### **Easy to use:**

Our one ounce pumps make portioning the doses a breeze. **MOXIE** Vibes concentrate has been designed to blend seamlessly into any drink. Instead of having to build your drink around a drink enhancer, you can focus on the taste of your beverage first without worrying about any flavor pairing or drink dilution. When using **MOXIE**, be aware of the TOTAL caffeine content of the drink (coffee or tea caffeine + **MOXIE** caffeine)

### **Shelf stable:**

This Energy Elixir can be stored right on your countertop, saving you valuable fridge real estate. Easy counter access makes for quicker service allowing you to pump, mix and deliver efficiently to your customers.

**Ingredients Explained:**

**MOXIE** - a concentrated blend of carpe diem, good mistakes, grit and sass to add to any drink

- Filtered water - only the the best out there
- Caffeine - 75 mg derived from Green Tea
- L-Theanine - known to assist in stress reduction, improve mood and switch your frequency into an alpha state
- Citric Acid - preservative
- Potassium Sorbate - preservative
- Sodium Benzoate - preservative
- B12 (as Cyanocobalamin) - support for mood and energy
