

High Performance Racing Elements

Swift racing filter elements are designed and engineered to meet the exact requirements of the performance racing industry. Our racing filter elements trap dirt and particulates that rob engine performance and horsepower. Swift racing filters help prevent clogged fuel injectors and unnecessary wear and tear on expensive internal engine and drive train components. Our products have a high dirt-holding capacity and low pressure drop that can help prevent premature failures.

To keep your valuable high performance and racing components protected from contamination and a loss in performance capability, choose a Swift Filters high performance racing filter. A true testament to our dedication to both manufacturing and design is our Quality Management System, a few examples of certifications we hold: ISO 9001:2015, ITAR Registered, MIL-SPEC 45208A, DFARS, REACH, RoHS Compliant, RoHS 2 Compliant, Buy American Act, Conflict Minerals Disclosure.

Swift Filters is proud to announce that we've developed the first aftermarket C8 Corvette Transmission Filter. Our OEM replacement part will offer the level of filtration required to keep your TR-9080 running in tip top condition! Our more robust part offers machined anodized aluminum caps with an improved integral bypass valve for more accurate operation. With over 40 years of filtration experience we build parts to outperform the competition!

FILTERS, Inc.™

Make Fluid Cleanliness Your Edge!

Swift racing filter elements are designed and manufactured to be compatible with most high performance racing fluids including synthetic oils, transmission fluid, gas, alcohol, nitro methane, water and water glycols. We have high performance disposable racing filters including nominal rated cellulose and absolute rated synthetics. We also have cleanable stainless steel wire cloth high performance filter media, absolute rated in 304/316 materials. Our media options offer numerous micron ratings from 0.2µm to 863 µm (nominal) in epoxy bonded, crimped and welded construction.

We Do Custom Elements!

We built our business by accepting non-standard projects that the “other guys” didn’t want. If you’ve got special requirements, give us a call.

Our elements are on fuel systems in
IRL® • NASCAR® • NHRA® • NTPA®
American LeMans® • Sprint Car •
Offshore Powerboat Competition

Every Swift product is manufactured in the USA at our facility in Oakwood Village, Ohio. For over 40 years we have been certified as an approved source for the U.S. Department of Defense and for private aerospace manufacturers. For six consecutive years we have been recognized with the Weatherhead 100 Award as one of the 100 fastest-growing companies in Northeast Ohio.
