# BEL VISO

# HISTORY

---

What is Bel Viso? These are quality fronts and interior solutions for everyone. It is the desire to make any room stylish, cozy and full of love.

How did it all start? VIYAR has been supplying furniture components and materials since 2002. We spent a long time choosing fronts that would suit us by all criteria: perfect value for money, aesthetics, individual solutions and customer focus. That is why in 2014 we came up with the idea to create our own brand that would meet all these needs.

***«We watched the joy and admiration of people seeing their new home for the first time. A place full of beauty and love.***

***So we decided: we produce happiness»***

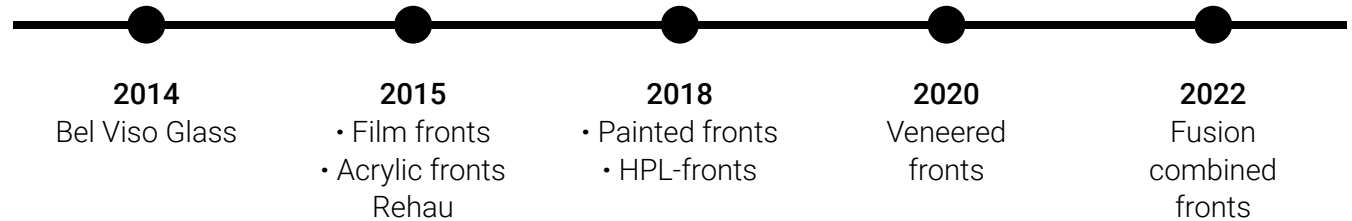

Bel Viso products are quality interior solutions for everyone. All samples of materials are collected in VIYAR showrooms, where you can touch them, compare and choose according to your needs. In the spring of 2021, the VIYAR opened its own factory for the production of Bel Viso fronts in Vasytkiv.

---

## THE HISTORY OF THE BRAND

## BEL VISO IN NUMBERS

The total area of the factory reaches **over 10,000 m<sup>2</sup>**.

The Bel Viso factory has **over 100 units of professional equipment**.

VIYAR has produced **about 1 million m<sup>2</sup> of fronts** since the creation of the brand.

The factory's capacity is **60,000 m<sup>2</sup> of various types of fronts per month**.

Bel Viso offers **10 types of fronts and over 3,000 decor options**.

*Bel Viso*<sup>®</sup>

BEL VISO

# PRODUCTION

We produce about 25,000 m<sup>2</sup> of fronts per month. The own production allows full control over all stages of production – from procurement of raw materials to packaging of finished products.

## Production of fronts

### Top brand materials

- MDF Egger
- Italian paintwork materials Sayerlack and Voteller
  - Fenix / ARPA
  - Rehau
- Cortizo aluminum profile
  - Film made in Italy and Germany
- Natural veneer and modified veneer of the Italian brand ALPI

### Professional equipment

- CNC machines Homag / Biesse
  - BHX drilling machines
- Diamond tool for mechanical processing
  - Fanuc robotic arm for processing manipulations
- Cefla Finishing and others

BEL VISO

# ADVANTAGES

---

- **Different types of front coverings:** matte and glossy, monochrome decors and patterns, imitations of wood, stone and other materials.
- **Individual approach to each order.** We are always ready to implement non-standard solutions and implement the most creative ideas.
- **No minimum order.** We manufacture both large bulk orders and small orders from 1 m<sup>2</sup>.
- **Attention to details.** We offer a ready selection of milled and cut-in handles for fronts.
- **10-year warranty.** The use of the best materials and quality control at each stage of production are our main principles of work.
- **The minimum terms of production.** Thanks to established production processes, the estimated production time for film fronts is 6 days, for painted fronts – 10 days.
- **Express production.** Thanks to the express production service, customers can receive orders in just 24 hours.
- **High-quality packaging** that protects fronts from mechanical damage during transportation.
- **Ecological products.** In production, we use certified materials that are safe for people and the environment.

# VENEERED FRONTS

---

## TOUCH THE UNIQUE NATURE PATTERNS

Bel Viso veneered fronts are covered with a thin layer of natural or modified veneer (0.5 mm thick) based on MDF. The main advantages are the natural texture and environmental friendliness of wood.

### We use two types of veneer:

- **Natural veneer** – a wood slice on which the natural texture is completely preserved. Manufacturer – «Euroshpon», Ukraine.
- **Modified veneer** is made using fine-line technology, which makes it possible to create a stable structure and shade. Manufacturer – ALPI, Italy.

Veneer should be covered with paints and varnishes, which guarantees protection from moisture, dyes, UV light, and also allows you to give the wood any shade. Types of coating: paint (RAL and NCS catalogs), stain, matte and semi-matte varnishes Sayerlack. Modified veneer is covered only with varnishes. The range of veneered fronts includes more than 80 decors.

**Bel Viso**<sup>®</sup>

## INFINITY OF CHOICE

Painted fronts Bel Viso are an opportunity to choose any color and not limit yourself. More than 2500 colors with the service of painting the sample (versions from the RAL, WCP, NCS catalogs), various coatings, milling, decorative elements, milled handles. And to give them a refined antique look, you can apply 7 colors of patina. Painted fronts are practical in operation, resistant to moisture and high temperatures.

At the heart – MDF board from the Austrian manufacturer Egger, covered with Italian paints Sayerlack. We also use acrylic varnishes that don't burn out over time. Production of painted fronts Bel Viso is fully automated, so the occurrence of shortages is minimized.

## LEADERS OF UNIVERSALITY

Film fronts are a universal and affordable solution for any of your projects. More than 150 trendy decors of films – monochrome, glossy, matte, imitation wood and metal and other materials, with and without milling.

At the heart of film fronts is the MDF of high density. For coating, we use PVC film from German and Italian manufacturers, in particular

the exclusive collections of Serica and Continental films with improved resistance to damage. Before pressing the film, the glue is applied to the entire surface and ends of the front to achieve the highest quality.

Film fronts are easy to care for, have optimal resistance to scratches, temperature changes and dyes.

# HPL-FRONTS & FUSION COMBINED FRONTS

---

## INCREASED DAMAGE RESISTANCE

In search of something special, the Bel Viso team created HPL-fronts. These are fronts based on MDF-boards covered with a high-pressure laminate (HPL). In production, we use:

- **Fenix** – nanotechnological anti-fingerprint material with a deep matte surface and the ability to recover.

- **Arpa** – decorative multilayer HPL-laminate with exceptional strength.

HPL-fronts are practical in operation, have high resistance to UV radiation, various mechanical damage, moisture and dyes. Now the company's range has more than 80 decors.

**Also, available to order is our innovative development – Fusion combined fronts with an oak handle.**

The basis of the front is MDF with wooden beams around the perimeter. Both sides of the front are covered with nanomaterial Fenix and HPL ARPA. The visible carpentry joint in the upper beam emphasizes the naturalness of the material.

# BEL VISO GLASS FRONTS

---

## METAL STRENGTH AND TRANSPARENT OPTIONS

Aluminum fronts Bel Viso Glass are a combination of a strong aluminum frame and glass or mirror filling. They are especially resistant to high temperatures and moisture, as well as unpretentious in care. That is why Bel Viso Glass is universal for any interior solution.

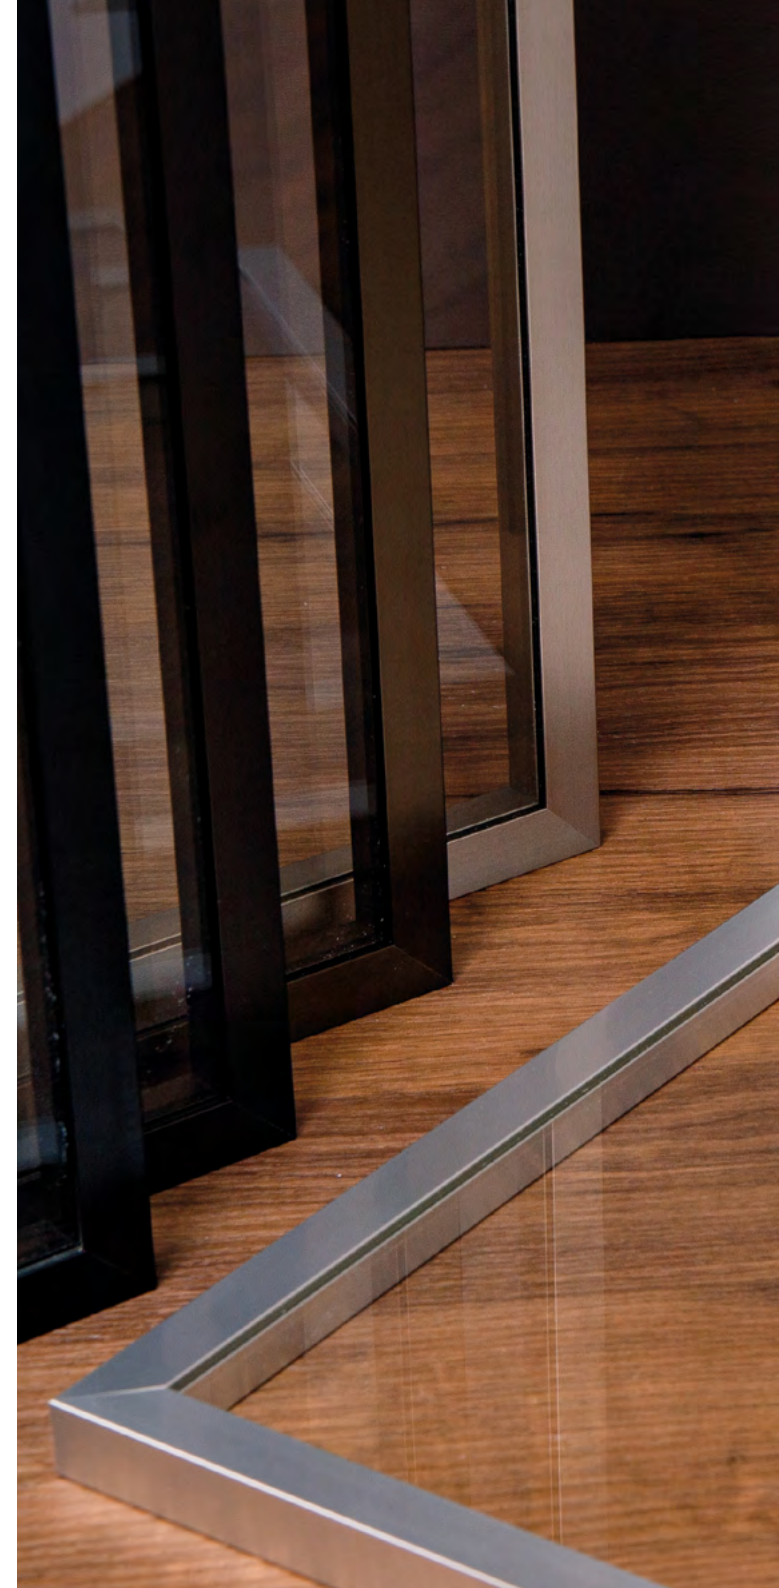

The fronts are based on more than 30 options of anodized aluminum profile with different types of coatings from the Spanish brand Cortizo, which protects the filling from mechanical damage.

The elements of the front are assembled at 45° and fixed together with metal corners.

The endless range of filling and services of UV printing, matting, color film application allows you to do something unique.

# ACRYLIC FRONTS

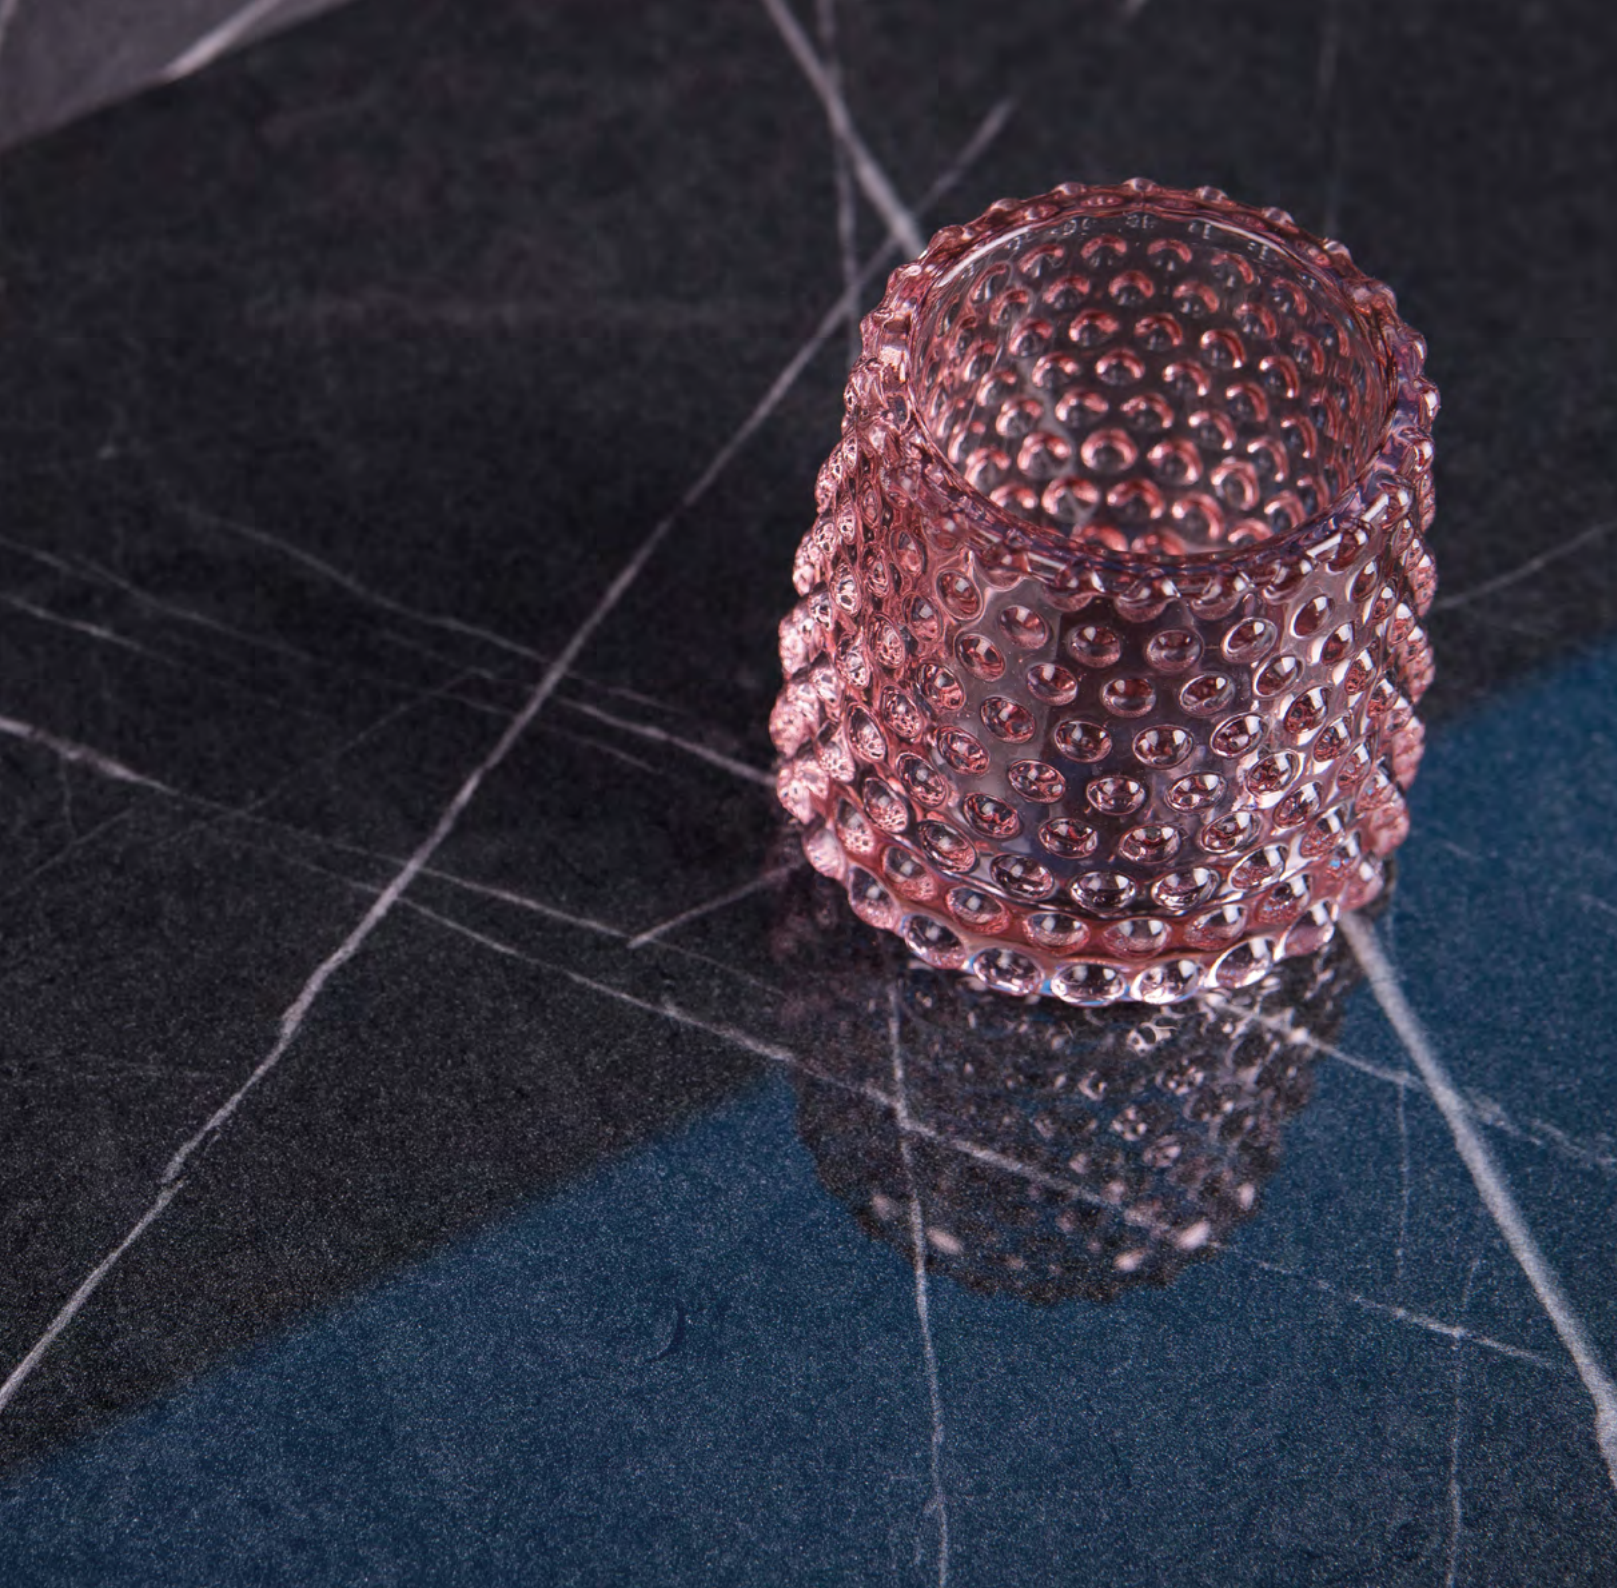

---

## SOPHISTICATION HAS A FORM

Acrylic fronts Bel Viso are created to embody the most sophisticated ideas in furniture design. In their manufacture, we take as basis panels with a glass laminate covering of Rauvisio Crystal from Rehau. This material doesn't differ visually from glass, but is more stable in operation.

Thanks to milling of a facet on the perimeter of a front, the 3D effect is reached. A total of 49 decors, including mirrored, monochrome and decorated plates with a matte or glossy surface.
