 - Sennheiser™ MD421
- **Passive Ribbon:**
 - sE Electronics™ VR1
- **Condenser:**
 - Neumann™ U87 P48

Data Set

- **About MPT and Natural Phase**

We provide two types of audio files: Minimum Phase and Natural Phase. If you're combining sounds with standard cabinet audio, it's better to use Minimum Phase files. Although recordings with a single mic sound the same in both formats, you'll notice a difference when you mix sounds using several mics.
- **Mix Mic**

Each mix created using different microphones is labeled with a distinct number. This list shows which microphones are used in each numbered mix.

File Format and Resolution

- **File Type:** WAV
- **Quality:** 24-bit
- **Sample Rates:** 96kHz, 48kHz, 44.1kHz
- **Impulse Response Duration:** Each IR is precisely 500ms for optimal resolution.
- **Compatibility:** Hardware units requiring shorter files will automatically truncate these 500ms files upon import.
- **Additional Formats:** Minimum Phase versions included.

Supported Devices

- **44.1kHz to 96kHz:** Strymon™ Iridium and BOSS™ IR 200
- **48kHz:** Suhr™ Reactive Load IR, CABCLONE™ IR models, Fryette™ Power Load IR, Fractal Audio™, Line 6™ Helix, and most IR loaders
- **44.1kHz:** Kemper™ units

Notice

Our digital products, including this Cab Pack, are non-refundable and non-exchangeable once purchased, as they are intangible digital items. All transactions are final.
