REBEL FOR HAPPINESS + 1000% PATENT > NO MORE BITTER, DIGESTION, DISCOMFORT

Hello, I'm Dr. Priemer,

As Arthur Schopenhauer said, "Health isn't everything, but without health, everything is nothing." People destroy their fitness and vitality, eat unhealthily, don't exercise, worry, stress too much, or use personal care products that don't really help.

Science explains nutrition and hygiene influence biological age + - 20%. So, a balanced natural diet and proper body care are mandatory from youth. It lays the foundation for a high quality of life and joie de vivre in old age.

I pursued bio-fragmenting whey protein into amino acids for over 10 years. Initially, less than 10% was fragmented and bitter like legacy-WPH. Finally, 10 times more fragmentation for a 1000% increase and 100% bioavailability. Our not bitter USA patent is recognized as state-of-the-art. Patents applied for elsewhere.

SUPER-WPH, all protein is broken down into 20 whey amino acids and di/tripeptides. Available in powder, foods, personal care products and bulk. A new basis for healthy fitness, vitality, comfort, and satisfaction.

My gift, as REBEL FOR HAPPINESS, to all consumers. I do a lot of sport, keep fit, and healthy. As a REBEL FOR HAPPINESS, I would like to share this attitude towards life with everyone. I would be happy if I could convince you to try this natural miracle ingredient.

IO INSIDE OUT

PROTEIN CHALLENGES

Excess H₂S increases flatulence,
risks of cancer, and other disease!

Adverse Effects Associated with Protein Intake above the Recommended Dietary Allowance for Adults: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4045293>

- Unpleasant: Legacy WPH includes artificial ingredients to hide bitter taste.
- Discomfort: GI track irritation, indigestion, cramps, bloating, constipation, diarrhea, and carbolic muscle destruction.
- Weakness: fatigue, lethargy, headache, lost concentration, dehydration, appetite loss, and DOMS.
- Embarrassment: **flatulence**, bad breath, irritability, disappointment and wasted \$.
- Danger: increased risk of colon inflammation, polyps, cancer, liver, kidney, seizures, heart diseases, blood vessel disorders, osteopenia, type 2 diabetes, and liability caused by excess **H₂S** from bacteria consuming excess protein in the colon.
- Recovery blocked: shakes bypass duodenum (0% bioavailability because not enough aminos and peptides in legacy WPH), digestive lag up to 6 hours, and anabolic window open timing 1/2 - 3 hours. All virtually out of user control.

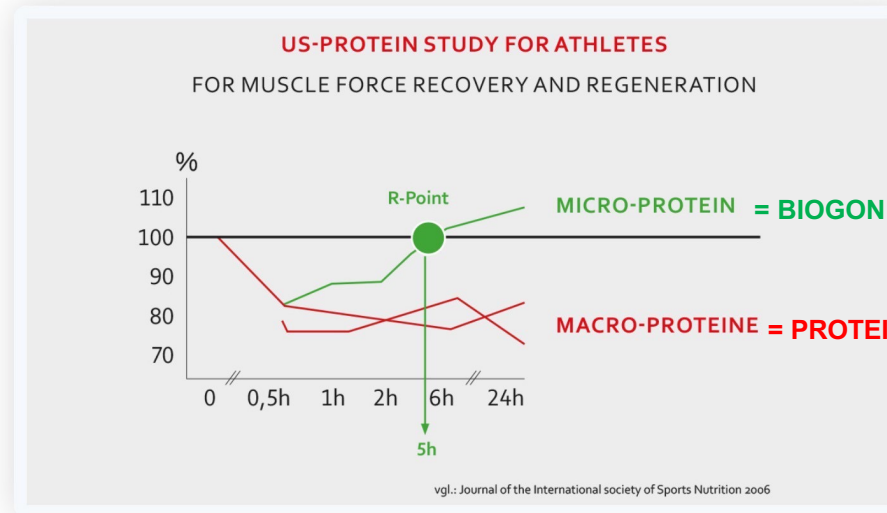

LEGACY WPH IS 3 - 15% HYDROLYZED SO BODY MUST DIGEST 97 - 85% PROTEIN

STOP DRY SKIN WITH SOAP PEPTIDES

FREQUENT WASHING MIRACLE SOAP (VIELWASCH-WUNDER-SEIFE):

Claims can be duplicated by TEWL measurements according to Prof. Elias* BRICK MORTAR MODEL, **one of the authorities in the state of the art.*

Concerns regular soap with a high pH of around pH 10.

Surfactant that is chemically **neutralized** on the **peptide film (soap peptides)**.

The **surface proteins** of clean skin are systematically covered by **soap peptides** through supra-molecular self-organization and thus form a **protective film on the skin**.

The **soap anions** are **neutralized** on this protective film.

Under the protective film, the underlying skin is essentially unaffected by **normal skin washing**.

As a result, the **lipids** between the **horny cells** and thus the **skin's moisture content** are largely retained.

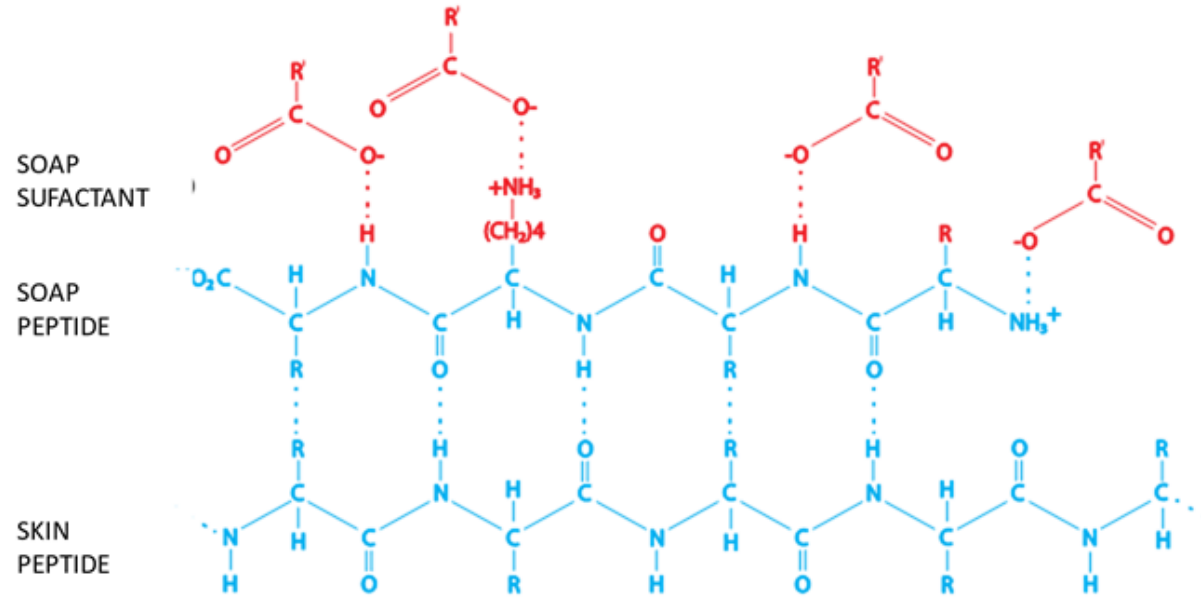

This also affects the NMF within the **horny cells**. **Skin moisture** is essentially protected***.

*** Penetrating **surfactants** are neutralized by the **protective peptide layer** on the skin - which comes from the **FREQUENT WASHING SOAP** i.e. de-protonized.

From a chemical point of view, this is a neutralization with the formation of non-detergent fatty acids, which are rinsed off together with the dirt.

Prof. Dr. Lothar Weber, Germany

SUPRA-MOLECULAR ENSEMBLE SKIN- AND SOAP PEPTIDES AGAINST SOAP -SURFACTANT PROF. DR. WEBER

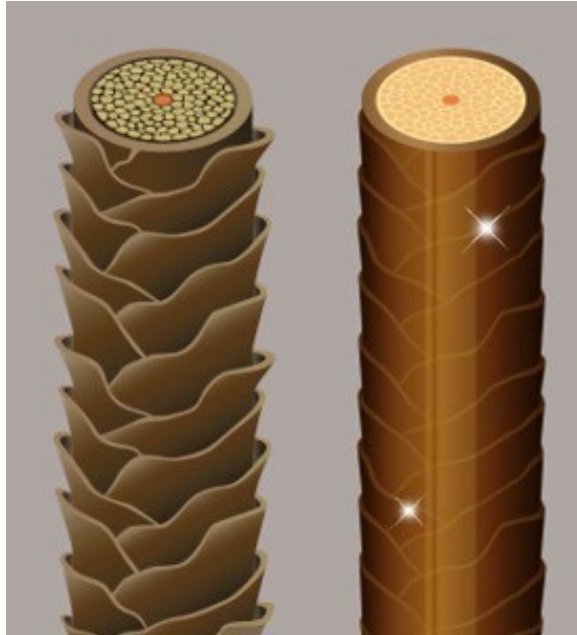

Supramolecular chemistry deals with the association of molecules to higher superordinate structures. Includes processes of self-organization, host-guest chemistry and the resulting supramolecular systems. Interactions are not covalent.

There are electrostatic forces such as hydrogen bridges, ion pair formation, acid-base interactions, van der Waals forces, and hydrophobic interactions.

Whey-amino-peptide molecules are specifically arranged with epidermal molecules and form hydrogen bonds.

Fatty acid anions in the epidermis arrange themselves in such a way that their carboxylate functions interact with the positive **amino or ammonium groups of the FULLY hydrolyzed whey protein (whey-amino-peptide)**.

PERFECT HAIR > BEST SHINE, BEST FEEL, AND MANAGEABLE

Before

After

For those who love instant hair shine and a healthy scalp.

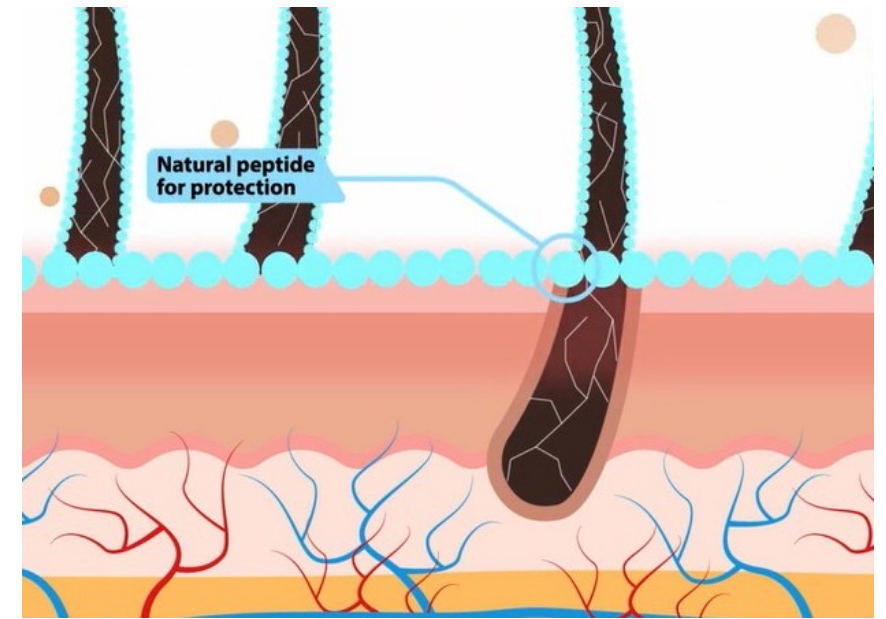

Peptides for more hair shine (closes and smooths hair Cuticles for more light reflection), stronger, elastic hair.

Peptides for scalp recovery > no itch.

5% **Peptides** in Dr. Priemer shampoo. Or 20% **Peptides** in Dr. Priemer TOPPING for your shampoo, hand mix!

Ideal for dull (open cuticles), frizzy, stiff, rough, brittle, dry, unmanageable hair, split ends, dehydration, and damage caused by environment, brushing, styling, and coloring.

No palm oil, silicone, petroleum, plastic, animal testing or animal remains (collagen).
