DIN RAIL TO PANEL CONVERSION KIT

- Cost effective solution for Panel Mounted MID Approved Multifunction Meter
- Fits within a 92mm² cutout
- Quick Installation

DIN RAIL TO PANEL CONVERSION KIT

This Panel Kit has been engineered to work with the following series:

- SDM72D
- SDM630 100a
- SDM630-MCT

We have manufactured this as a cost effective solution for a MID approved multifunction panel-mounted meter. This cradle has been designed for a quick & easy installation as opposed to similar products available.

Specification

The din rail to panel conversion Kit provides a solution to a MID approved multifunction meter. This Panel Kit works in comparison with many of our three Power Meters which comes as a Dinrail mounted. The Panel Kit acts as a cradle which holds the Dinrail meter securely in place, the fascia of the Panel Kit creates a 96mm² fascia. The Kit consists of two separate components making it practical, fast and easy to install.

This Kit allows the screen of the meter to be visible within the 96mm² square panel enclosure. Due our meters featuring touch-screen buttons, the user can cycle through all parameter options whilst the meter is secured within the Panel Kit.

Dimensions
