## Equalizers, Crossovers, Capacitors, and Installation Kits

Think of equalizers, processors and capacitors as your very own sound technicians, adjusting the loudness of specific frequencies, bringing spatial realness to your speakers and pushing more juice to your amplifier. They make EDM more thump, thump, thump and take the strings in classical music to lighter and brighter highs. And, of course they can focus on that low, low bass so your subwoofers cause minor earthquakes.

Along with our installation kits, **BOSS Audio Systems** delivers exacting products and configurations to help you customize your musical experience to how you like it to precisely sound – and feel.
