

Lindhaus CH Pro 15 inch & RX Hepa 380 EcoForce Dual Motor Upright Vacuum

The machine comes down completely horizontally for easy access under low furniture and beds. The non positive latch system prevents from accidental breaking due to non crushing of the release pedal. The electronic overload control switches off the motor in case of excessive overload and provides guidelines for the proper adjustment of the base. The blowing function (optional) makes it possible to dislodge the most difficult dust to be sucked.
