# Lyofoam® Max

A HIGHLY ABSORBENT POLYURETHANE FOAM DRESSING

Lyofoam Max is a highly absorbent dressing. It consists of a polyurethane foam and a waterproof backing film with high permeability to allow for an effective exudate management of moderate to highly exuding wounds.

POLYURETHANE BACKING FILM

- Moisture vapour permeable
- Waterproof
- Passed viral penetration test
- Passed wet bacterial resistance test

HYDROPHILIC POLYURETHANE FOAM

- High absorbency and fluid retention capacity
- Works under compression
- Soft, conformable and easy to apply and remove

AREAS OF USE

Lyofoam® Max is designed for the management of moderate to heavily exuding wounds such as leg ulcers and pressure sores.

Through an excellent exudate management, Lyofoam Max creates a moist wound environment for optimal wound healing to take place.

KEY BENEFITS OF LYOFOAM MAX

- High absorbency and fluid retention capacity[1]
- Reduced risk of maceration, less potential for leakage and longer wear-time[1]
- Waterproof backing film acts as a barrier to bacteria and virus penetration
- Works under compression
- Easy to apply and remove
- Soft and conformable and provides comfort to patients
- Non-sensitising
- Wide range of sizes available for different wound types

HOW TO USE LYOFOAM MAX

1. Clean the wound area and select a suitable size of Lyofoam Max.

2. Place the foam side directly onto the wound surface, overlapping the wound margin by about 2cm.

3. Secure Lyofoam Max with an appropriate bandage such as Tubifast, Tubigrip, System 4 or a fixation tape such as Mefix.

FREQUENCY OF CHANGE

Lyofoam Max may be left in place for several days depending on the nature and condition of the wound and the level of exudate.
