

100 mM each rNTP Mixture

Cat. #: PCN-05

CONCENTRATION: 100mM each

SIZE: 0.25 or 1 mL each of the four nucleotides

Store at -20°C

For research only

DESCRIPTION

rNTP set is a set of aqueous solutions with pH 7.0 containing ATP, CTP, GTP and UTP, each at a final concentration of 100 mM.

APPLICATIONS

For applications in which ATP, CTP, GTP and UTP are required, for example, in vitro transcription.

PRODUCT USE LIMITATION

This product is developed, designed, and sold exclusively for research purposes and in vitro use only. The product was not tested for use in diagnostics or for drug development, nor is it suitable for administration to humans or animals.
