- ⑤ Remaining Filter Life

PM2.5 Value	Air Quality	Air Sensor Indicator Light
0-12	Excellent	
13-35	Good	
36-55	Fair	
>55	Poor	

Button Instruction

Power On/ Off

The power button will turn red after plugging it in. Press the on button and the button will turn white after powering on.

Speed Adjustment

The fan speed can be adjusted into 5 different speed settings. Push the fan button once each time to adjust the speed.

Auto Mode

Press once to enter automatic mode is turned on, the indicator light is on, and the air purifier will automatically adjust the wind speed according to the air quality.

Sleep Mode

Press once to enter sleep mode. Once in sleep mode, the screen and other indicators will turn off and the speed will run at its lowest setting. 10 seconds after pressing the sleep mode button, the sleep mode button's light will turn off. Touch any button twice to exit sleep mode.

Timing Setting

Timing setting will lock in the current settings for 1-12 hours. After the time is complete, the air purifier will automatically turn off. When the indicator light is on, it means the timing is set successfully. Set it to 0 hours to exit the timing setting.

Adjustable Light

The adjustable light has three different brightness settings. Adjusted by pushing the adjustable light button once for each adjust.

Filter Change Reminder

The filters have a life of 3000 hours. The screen displays 6 grids, for every 500 hours completed, a grid will be reduced. When the remaining time of the filter life is less than 150 hours, the filter indicator's last remaining grid will begin to flash, reminding the user that the filter needs to be replaced.

Safety Instructions

When using this product, you must observe the following safety precautions and read the relevant instructions carefully!

PROHIBITED!

Do not plug or unplug the power adapter when your hands are wet.

Do not block the air inlet/outlet

Do not use the machine in places with heavy humidity or oily smoke such as bathrooms or kitchens.

WARNING!

Clean the dust on the body and power plug regularly.

Only use the power adapter provided with the machine.

When using this machine, do not put it close to or place it on heat source objects (such as fireplaces, stoves or places where it may come into contact with flammable gas).

Please be careful when cleaning the air purifier. Strong and corrosive cleaning agents will damage the surface of the unit.

When cleaning or not using the machine, please unplug the adapter from the power outlet. Otherwise, it may cause electric shock due to poor insulation or fire due to short circuit.

NOTICE!

This machine is not suitable for the handicapped, mentally impaired, or children to operate by themselves. Any operation of the machine should be supervised by an able bodied adult.
