

# CLIMATE POSITIVE Staff WORK FORCE

deadgood®

*Deadgood products are  
consciously designed & locally  
made.*

## Conscious products

Deadgood manufactures over 90% of their products in the UK.

‘Get Wasted’ is a new standard finish, utilising 100% recycled paint powders that would otherwise end up in landfill. Grey in colour and inconsistent in tone from batch to batch, the finish is speckled with small flecks of extra colour throughout.

# LOCAL YOKEI Make GLOBAL REACH

‘made for disassembly’

‘Sprung’ and ‘Flare’ upholstered collection is developed with sustainability at the forefront of the design process. The plywood framework is 100% recycled and fully recyclable. The webbing is replaced with durable springs, each one with the ability to be removed and replaced. The covers removable & made from recycled ocean waste.

## Climate Positive Actions

Partnered with Ecologi, Deadgood plant trees in their ‘company forest’ – so far having planted 1.3k trees & financially support carbon reduction projects globally.
