Drench In-Furrow
True Nitrogen-Fixing Microbes
by Mikrobs

Hydro
Application

Boost Growth with Eco-Friendly Nitrogen!

NET CONTENT

8 fl.oz.

- Converts nitrogen from the air to readily-available nitrogen with nitrogen-fixing rhizobacteria
- Utilizes both symbiotic and free-living nitrogen-fixing bacteria for effective performance in a wider range of crops and plants.
- Increases availability of other nutrients around plant roots, enhancing plant growth.
- Can be tank-mixed with conventional fertilizers.

CONTAINS NON-PLANT FOOD INGREDIENTS

Active Ingredients

1.0%Nitrogen Fixing Rhizobacteria

Inert Ingredients

2.0% Alfalfa Extract
97.0% Inactive / Water

Microorganisms

10,000,000 cfu/ml.....Azotobacter chroococcum
10,000,000 cfu/ml.....Azospirillum brasilense

STORAGE

Store in a cool and shady area.

CAUTION

Do not inhale or drink. Avoid direct contact with eyes and skin. Keep out of reach of children.

DIRECTIONS

Creating the Blend: Shake bottle well, then mix with tap or distilled water following the recommended mix ratio in the chart below.

Do not apply under hot, direct sunlight, especially when using a foliar spray or a broadcasting hose.

APPLICATION	NIN-FURROW	HYDROPONICS	SOIL DRENCH
MIX RATIO	10 fl.oz / Acre	2.5 - 5 ml / gal.	5 - 7.5ml / gal.
INTERVAL	7 - 10 days	10 - 14 days	As per fertilizer regimen
