

CATS

ACTIVE INGREDIENTS:

Sharp claws.....	7%
Sharp teeth.....	7%
Exceptional senses and reflexes.....	7%
Killer instinct.....	7%

INERT INGREDIENTS:.....72%

EPA Exempt – 0 day pre-harvest interval (PHI) – 0 hour restricted-entry interval (REI)

CATS is a novel biological control agent used in the suppression of rodent populations.

Use instructions:

Release CATS in areas of high rodent pressure.

Target pests:

Mice, Rats, Moles, Voles and other destructive rodents.

Application rates:

For rodent suppression, apply CATS at the rate of 1 or 2 per farm. For heavy infestations 3 or more CATS may be required. Typically no more than one application of CATS is required.

Storage:

When not in use leave the farmhouse door open and CATS will store themselves in a warm, dry place.

CATS are made by other CATS.
