

COMPOSTHEROTM
BY WAKEFIELD BIOCHAR

Nature's Power Through A Healthy Soil

Healthier Soil

Increase microbial activity with a biochar blend to supply more nutrients to the roots of your plants

Drought-resistance

Superior water retention with biochar added to compost

Long-lasting love for your soil

Biochar in the CompostHERO mix will benefit the soil for 100's of years

THE BIOCHAR BONUS!

Sequester carbon back into the soil instead of releasing it as CO₂ into the atmosphere

ABOUT COMPOST HERO

Wakefield Compost HERO adds organic carbon and mycorrhizal fungi to your soil to increase water retention and nitrogen absorption. Through natural processes your soil will get more nitrogen and keep it in the soil through the additional microbes inoculated into the biochar.

**Premium Biochar & Compost
Blended with
Mycorrhizal Fungi**

| BIOCHAR - WOOD | Units |
|--|--------------------|
| Total Carbon | 88.01 % total mass |
| Total Ash | 4.88 % total mass |
| pH | 7.4 units |
| Nitrogen (N) | 0.59 % wt. |
| Potassium (K) | 614 mg/kg |
| Hydrogen | 0.40 % wt. |
| Oxygen | 6.09 % wt. |
| USDA CERTIFIED BIOBASED PRODUCT | |

| ORGANIC COMPOST | Units |
|---|-------------------|
| Organic Matter | 494.0 lbs per ton |
| C:N Ratio | 15:1 |
| pH | 6.4 units |
| Nitrogen (N) | 1.79 % wt. |
| OMRI-LISTED by BlueBird Composting LLC | |

| MYCORRHIZAL FUNGI |
|------------------------------|
| Endomycorrhizal Fungi |

DIRECTIONS

Prep Soil

**Mix Into
The Soil**

Place Seed

Add Water

Enjoy!

Enhance your soil with premium compost, biochar and mycorrhizal fungi. One bag is best for 32 sq/ft of soil and compost mixed into the top 4"-6". A good guideline is to make the Compost HERO mix between 10-20% by volume of the total soil mix in the area of application.
