ORGANIC FERTILIZER

Earthworm Castings

"Unbelievable fertilizer! I have never seen such a profound reaction from adding a fertilizer to plants until using Mountain Gate Organics. You can actually watch the dark green climb up the stalk of your tomato plants, and everything I put this fertilizer on has flourished. I appreciate the organic non-chemical nature of the product as I am ultimately serving these fruits and vegetables to my family. I use the product in the garden but I also use it on my houseplants, stick a finger in the dirt and fill with this fertilizer and watch your houseplants perk right up. It plays an important role in our vineyard, orchard, garden and houseplants. I can't say enough about it, this is a superb natural fertilizer with a rapid and visible effect on the plants to which it has been applied. Happy Gardening!"

— David M. Elkton

Directions for Use

VEGETABLES AND ANNUAL FLOWERS

Line bottom and sides of plant holes with 1"-2" of fertilizer. Set seeds or plants in place and cover with soil. Side dress during growing season at a rate of 1/2 cup per plant or 1 cup per linear foot of row once every 2 months.

POTTED PLANTS AND SEEDS/SEED FLATS — NEW

Work 1/2 cup into the soil above their root zone taking care not to damage shallow roots. Apply in spring, early summer and early fall.

POTTED PLANTS, WINDOW BOXES, HANGING BASKETS — ESTABLISHED

Add 1"-2" of earthworm castings to top of soil. Mix in taking care not to damage shallow roots - water - repeat every 2-3 months.

PERENNIALS

Work 1/2 cup into the soil above their root zone taking care not to damage shallow roots. Apply in spring, early summer and early fall.

ROSES, TREES, SHRUBS, AND BERRIES — NEW OR FRESHLY TRANSPLANTED

Mix 1 part fertilizer to 3 parts soil. Surround newly dug hole with mixture. Spread roots over a mound of the mix in the hole and cover.

ROSES — ESTABLISHED

Mix 4 cups of fertilizer into soil 2"-3" below the surface for each plant.

LAWNS — NEW

Apply 10 lbs. per 100 sq. ft. Work lightly into the topsoil. Mix in grass seed and water well.

LAWNS — ESTABLISHED

Distribute as top dress 10 lbs. per 100 sq. ft.

CASTING TEA

Soak 1 part fertilizer in 3 parts water for 12-24 hours. Strain and water as usual. Casting tea is excellent for fruiting, flowering, or difficult to access potted plants.

COMPOST PILES

Spread a thin layer of fertilizer between each new layer of material to be composted.

The worms that make the fertilizer also make for great fishing bait.
