

NATURE SAFE FERTILIZERS 101

SEVEN SPRINGS FARM SUPPLY

Nature Safe 5-6-6

Particle Size: Fine

Timing: Provides green-up in 7 to 10 days and will release nitrogen for 8 to 10 weeks.

About: Created from recycled meat and bone meal, blood meal, langbeinite, and includes Ca, Mg, and S.

Ideal for: Turf formulation as well as a general purpose NPK fertilizer.

Nature Safe 7-7-7

Particle Size: Dry flowable

Timing: Nutrients are immediately available with application.

About: Made from corn steep liquor, it consists of equal parts nitrogen, phosphate, and potassium to maximize growth. This is a plant-based protein.

Ideal for: Drip applications (berries, permaculture, perennial crops, vegetables). This dry flowable is a fast-acting corrector of nutrient deficiencies.

Nature Safe 7-12-0

Particle Size: Pelleted & Coarse

Timing: Application intervals can range from 30 to 90 days. Provides green up in 7 to 10 days and continues to release nitrogen for 8 to 10 weeks.

About: Consists of meat and bone meal, blood meal, and feather meal.

Ideal for: Use to correct P and Ca deficiencies. It has the highest levels of Calcium of any Nature Safe formulation at 10% Ca.

Nature Safe 8-5-5

Particle Size: Pelleted

Timing: Provides green up in 7 to 10 days and continues to release nitrogen for 8 to 10 weeks.

About: Designed for a steady release of nitrogen. Contains bone meal, feather meal, blood meal, and sulfate of potash.

Ideal for: Vegetable Production. Includes Calcium (calcium deficiency leads to Blossom End Rot in tomatoes, peppers, etc). Great pre-planting and bed-prep formulation.

Nature Safe 9-0-9

Particle Size: Coarse

Timing: Provides green up in 7 to 10 days and continues to release nitrogen for 8 to 10 weeks.

About: This is a high nitrogen, high potassium fertilizer made with natural feather meal, meat meal, blood meal, and sulfate of potash.

Ideal for: When Phosphate is not desired/needed. Some regions/states have Phosphate restrictions due to environmental concerns.

Nature Safe 10-2-8

Particle Size: Fine & Coarse

Timing: Provides green up in 7 to 10 days and continues to release nitrogen for 8 to 10 weeks.

About: Effective all year round, this is a natural feather meal, meat and bone meal, blood meal, and sulfate of potash mixture.

Ideal for: General purpose fertility. Has a balance of nutrients for a variety of crops. Great for side dress applications.

Nature Safe 13-0-0

Particle Size: Pelleted & Coarse

Timing: Releases nitrogen for 8 to 10 weeks.

About: A high nitrogen, natural fertilizer consists of feather meal, meat meal, and blood meal.

Ideal for: Ideal for Nitrogen loving plants (corn) or N deficient plants.
