A Wave OF NUTRITION FOR OVER 70 YEARS

Dr. Maynard Murray's groundbreaking research uncovered the secret of ocean-powered nutrition and the unique source of Sea-90®. Our exclusive location in the Baja features pristine ocean water from the Sea of Cortez enhanced by geothermal activity and mineral-rich alluvial topsoil. Naturally solar dried, the resulting Sea-90 Ocean Minerals contain a balanced mineral and trace element profile not found anywhere else in the world.

Ocean minerals naturally supercharge soil, enhance plant nutrient density, and support animal health.

MACRO & TRACE MINERAL NUTRIENTS

Sea-90's exclusive mineral and trace element profile complements and balances traditional NPK fertilizers with the important nutrients they often lack.

MICRONIZED FOR INSTANT SOLUBILITY

Dissolves quickly thanks to 99%+ water solubility and ultra-fine particle size. Perfect for foliar, hydroponics, or drip irrigation applications.

IMPROVED FARM PRODUCTIVITY

Nature's complete nutrient tool kit helps power increased yields, improved RFV and protein values, and more flavorful, nutrient-dense plants, crops, and pastures.

DIRECTIONS

For production of all crops and plants. Suitable for organic farming.

Avoid over-spraying at end of row by turning off nozzles while turning.

Spray Indicator can be used to monitor application area.

CAUTION: USE AS DIRECTED.

Foliar (Pasture and Hay): Spray 5 lbs. per acre dissolved in 20 gallons of water at green-up and after each rotation or cutting.

Hydroponics and Drip Irrigation: Add to nutrient solution at a rate of 1 lb. per 100 gallons or 1 tsp. per gallon.

Foliar (Vegetables and Small Fruits): Spray 3 lbs. per acre dissolved in 20 gallons of water every 14 days throughout the growing season.

Compost Tea: Add 1 tsp. per 5 gallons of tea pre-brew.
