

Biorepel® is a natural insect repellent. The active ingredient is garlic extract. The US Environmental Protection Agency (EPA) has exempted Biorepel® from registration as a pesticide under FIFRA 25(b). Biorepel® can move pests out of an infected area or repel pests from initially entering an area.

Biorepel® is non-phytotoxic, meaning it will not harm or burn your garden plants and has no "after taste" on edible plant parts or fruits. Biorepel® is suitable for organic production.

APPLICATION GUIDELINES

Thoroughly mix 1 part of Biorepel® with 100 parts of water. Agitate mixture for one minute before application.

BENEFITS OF USING BIOREPEL®

- Organic and safe
- Non-phytotoxic
