

# JEEP JL Wrangler / JT Gladiator

## Front and Rear Brake Upgrade

### Applications

On and Off-road

### Key features and benefits

- Gains in performance over stock braking system:
  - Up to 14% reduction in disc temperature rise
  - Up to 35% reduction in pad work rate
  - Up to 10% reduction in pedal effort
- Ductile Iron caliper housing providing maximum strength and stiffness as well as high resistance to impact and fatigue
- Epoxy acrylic paint over acid zinc finish for maximum corrosion protection
- High friction pads increase stopping power
- Larger rotors increase brake torque and thermal capacity, reducing potential for brake fade
- Increased pad area reduces temperatures and increases pad life

### Part numbers

|                          | Front       | Rear        |
|--------------------------|-------------|-------------|
| <b>Brake Kit Part No</b> | BKF1551K06  | BKR5059D12  |
| <b>Caliper</b>           | 6 piston    | 4 piston    |
| <b>Rotor</b>             | 350 × 32 mm | 330 × 22 mm |
| <b>Pad Material</b>      | Heavy duty  | Heavy duty  |

### Specifications

- High temperature seal material as used in highest levels of motorsport
- Wiper seal on every piston for dirt exclusion
- Fits many 17" and larger aftermarket wheels
- Compatible with stock OEM actuation
- Retains and utilizes OEM parking brake

### Fits

- 2018 - present Jeep (JL) Wrangler
- 2020 - present Jeep (JT) Gladiator

▲ 4 piston rear calipers, rotors and brackets

▲ 350mm front rotor

▲ 6 piston front caliper
