LETTER OF GUARANTY – COMPLIANCE WITH 21 CFR

To Whom It May Concern:

The USDA Food and Safety and Inspection Service, FSIS Directive 5000.1, “Verifying an Establishment’s Food Safety System Handbook” requires an establishment to develop and employ sanitation or processing procedures that meet USDA regulatory sanitation performance objectives.

The products listed below are acceptable for use where the product or steam produced may contact edible products and/or cooling systems. The products listed below consist of ingredients that are GRAS (21 CFR Parts 182 or 184) or substances cleared under 21 CFR 173.310(c) according to the U.S. Food and Drug Administration (FDA). Additionally, none of the ingredients are prohibited from use in applications where steam may contact milk products.

When the product(s) are used under the intended conditions of use as outlined on the product label, catalog sheet, or specified in a Standard Operating Procedure (SOP), they will not adulterate food product. The products are suitable for use in boilers and steam lines where the steam produced may contact food, milk or milk products and are formulated in compliance with 21 CFR as well as NSF certified for use where there is possibility of food contact.

- BioTherm Fluids AF (NSF registration No. 142359)
- BioTherm Fluids PGX (NSF registration No. 142358)

Sincerely,

Shawn McGlothlin
