

SIMPLIFY YOUR WORK LIFE
WITH RANGER DESIGN'S

ACCESS STOW

DESIGNED FOR HIGH ROOF VANS

THE PERFECT FIT
FOR YOUR
TOUGHEST JOBS

RANGER DESIGN'S ACCESS STOW LADDER RACK

SAFETY FIRST

This rear loading rack slides your ladder down to ground level, eliminating injuries from stretching or climbing up onto the van roof.

Polyester straps keep the ladder secured tightly on the rack, and a military grade locking mechanism locks the rack in place while driving.

DOUBLY EFFICIENT

The Access Stow's double width option is designed to carry two extension ladders for extra efficiency.

The single width option can also be paired with other Ranger Design racks for optimal use.

SIMPLICITY IS KEY

Loading and unloading your ladder with the Access Stow is an easy, single-stage operation that only takes seconds.

Assembly and installation of the Access Stow is also a fast process to ensure your van is ready to go as quickly as possible.
