THE FLETTNER VENT WITH A ROTARY DESIGN

NEW PRICING!

Applications of the Flettner Ventilator are endless in the mobile world from commercial vehicles and trailers.

The main benefits are:

- > Extract heat and cool the inside of the vehicle for passengers and goods in transit
- > Remove moist, humid air thus reduce condensation which can cause the vehicle to be damaged by rust or corrosion and damage any goods in transit
- > Remove odours, smells and fumes making for a cleaner, safer environment for the driver or passengers
- > Eco-friendly and totally wind powered – subject to a 10mph wind they will ventilate even when the vehicle is stationary
- > In addition, there are no running costs or maintenance costs.

Stale air, strong odors, condensation and excess heat create a severely degraded working environment. This can be uncomfortable and unhealthy for vehicle occupants and result in the spoilage of carried goods, packaging and the vehicle interior.
