

IN-EAR MONITOR  
MDR-EX800ST

Serving artists their  
performance, straight up

MDR-EX800ST are in-ear monitors developed for stage use. Jointly developed by Sony, boasting some of the world's most advanced technology, and Sony Music Studios, which knows the arena of live music inside and out. Besides offering superb audio quality, they're built to withstand the rigors of dynamic performances.

Lavishing a wealth of expertise in  
studio monitor headphones

Jointly developed by Sony and Sony Music Studios, just like the MDR-CD900ST monitor headphones that are highly acclaimed by recording studios. Exactly tuned through subtle manual adjustments, for consistent acoustic characteristics among individual units.

The fit and durability needed  
in live performance

Featuring flexible ear hangers that can be adjusted to follow the shape of your ear, ensuring a secure fit. Also offers the durability and practicality needed in live scenarios, with features including a high maximum input resistance of 500mW and a cord that can be easily replaced in case of accidents.

Faithful audio reproduction in studios

Promises artists the freedom of IEMs while offering natural frequency response rivaling monitor speakers in recording studios, thanks to ample 16mm dynamic driver units. Outstanding resolution for monitoring.
