Litonet EVO

LIQUID DETERGENT FOR REMOVING MARKING RESIDUES OF EPOXY MORTARS FROM ANY TYPE OF CERAMIC TILES, MOSAICS AND NATURAL STONES. ALSO EFFECTIVE FOR THE DEEP CLEANING OF TOUGH DIRT.

DESCRIPTION	Litonet EVO è un detergente liquido concentrato a pH alcalino idoneo per la pulizia di qualsiasi tipo di piastrelle ceramiche anche delicate come ad esempio ceramiche lappate, mosaici vetrosi o ceramici e qualsiasi tipo di p naturale anche lucidata. Litonet EVO, having a low viscosity, is suitable for cleaning floors.		
ADVANTAGES	 Versatile and usable on all surfaces Water-based product Non-aggressive solution, which can also be used on polished marble and honed or polished stoneware without the risk of corrosion or tarnishing Exempt from hazard classification for transport Excellent degreasing and wax removal power 		
PACKAGING	Litonet EVO 1 bottles (boxes with 12 pcs) 5 cans		
FIELDS OF APPLICATION	 Il detergente utilizzato puro, non diluito è particolarmente efficace per la rimozione di residui o alonature di malte epossidiche tipo Starlike[®] EVO, Starlike[®] Crystal EVO, Starlike[®] ColorCrystal EVO, EpoxyÉlite EVO e EpoxyÉlite EVO FR, nonché per la rimozione di aloni sul gres porcellanato levigato, macchiato da precedenti stuccature effettuate co sigillanti cementizi di colore scuro. Litonet EVO can also be used as: Degreasing alkaline detergent: effective in removing greasy residue, organic dirt deposits accumulated over time and wax from all natural or artificial surfaces. In this case, dilute the product to 30% in water Deep cleaning detergent for porous materials: effective against dirt trapped in the pores of materials such as full surface honed and full body polished porcelain stoneware. Dilute the product to 30% in water Periodic deep cleaning detergent: effective on all types of surfaces characterised by intense dirt, which cannot be removed using commonly sold detergents Detergent used to clean resilient flooring such as PVC and linoleum 		
APPLICATION	 Shake well before use. For the removal of epoxy grout halos or residue, the detergents must be applied once the grouting has sufficiently set (normally after 24 hours at a temperature of +20/+25°C). For fresh residue the product requires less time to work, while for more consolidated residue, the product will need to be left in contact for longer. Apply the pure, undiluted product directly onto the affected surface, spreading it evenly using a special pad or brush. Then rub the surface with white felt (art. 109GBNC) or using a single disc machine with a white disc pad for larger surfaces. It is recommended to mechanically rub the product when applied to facilitate its removal. Collect the cleaning solution using a sponge, rubber squeegee broom or wet vacuum cleaner. Finally, rinse well with clean water and dry with a clean rag or cloth. Do not wait for the rinse water to evaporate as this may cause halos to reappear on the surface. If epoxy grout residue can still be seen after rinsing, repeat the application following the same procedure. 		

Detergents

WARNINGS	 Spread the product at temperatures between +5°C and +35°C Wear protective clothing during handling. Follow the instructions shown on the label and safety sheet Before use, protect doors, windows, rubber gaskets, furniture, taps and fittings, metal or PVC profiles and all surfaces that may be damaged by direct contact with the detergents Change the rinse water frequently In the case of accidental leaks, soak up the product using an absorbent material (paper, sawdust, vermiculite, etc.) and dispose of it in a suitable container Do not use the product for applications not stated in this technical sheet If in doubt, contact the Litokol S.p.A Technical Help Service. 		
SAFETY INFORMATION	Consult the product safety data sheet, available on request. PRODUCT FOR PROFESSIONAL USE		
IDENTIFICATION DATA	Appearance	Litonet EVO - Clear liquid	
	Colour	Colourless	
	Odour	Peach	
	Customs code	34025090	
	Shelf life	24 months in original packaging away from sources of heat and direct sunlight. Protect against frost.	
APPLICATION DATA	Treatment time	10 - 15 minutes	
	Flammable	NO	
	рН	11,5 - 12,5	
	Specific gravity	1,01 kg/l	
	Application	Sponge or white felt	
	Application temperatures	From +5°C to +35°C	
	Consumption	10 - 15 m²/l	
NOTES	Data detection at temperature +23 °C, R.H. 50% and with no wind. May vary depending on the specific conditions of the installation site.		
Data Sheet n. 310/a Revision n. 0 Date: September 2022	The information and provisions contained in this technical data sheet reflect our best experience. Given the impossibility of directly intervening on the conditions of the work site and execution of the works, they represent indications of a general nature, which are in no way binding on our Company. It is therefore advisable to perform a spot test to check the suitability of the product for the intended use. In any case, users must determine whether or not it is suitable for the intended use and shall assume all associated responsibility.
