

## INSTRUCTIONS FOR SETUP & USE ECO-SAFE MODEL RK AMMOBOX

*Use rubber gloves when setting up, cleaning, and packing up any toilet system*

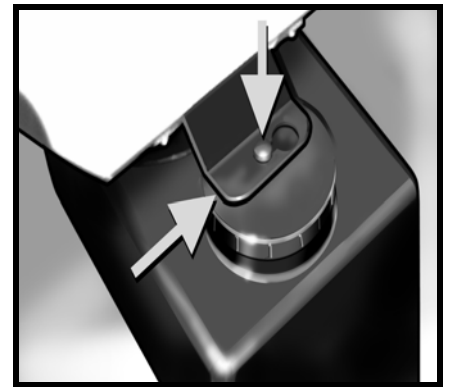

Unscrew 6" CAP and remove accessory container.

Eco-Safe Model RK tank may be placed into 20mm ammo box or used as a stand alone system. If used with 20mm ammo box, place Eco-Safe tank UPRIGHT in ammo box so caps and openings are accessible.

Only before first use add 4 to 8 oz. of bio-degradable chemical deodorant approved for portable toilets.

This can be done before starting your trip. These chemicals are available at RV stores and stores that sell portable camp/marine toilets..eg..K-Mart, Wal-Mart, sporting goods, hardware.

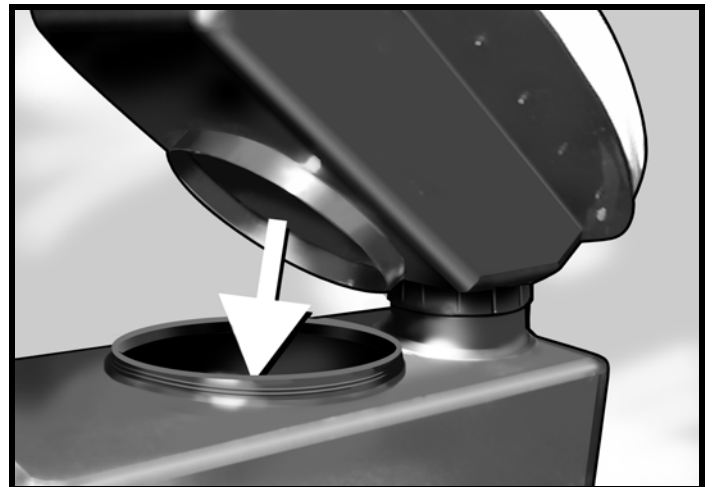

Secure seat to Eco-Safe tank by holding seat assembly upright and lock keyhole tab which is on back of seat assembly onto grooved stud that is on the 3" waste cap.

Lower seat assembly so that circular flange on bottom side of seat assembly slips into 6" port.

Place Eco-Safe system on level, firm surface and you're ready to go.

Note: Add enough bio-degradable chemical deodorant and/or liquid throughout your trip so tank contents are maintained in a semi-sludge condition. This will make for easy tank dumping.

Note: Clean seat assembly bowl by spraying with window cleaner or household cleaner.

***CLEAN HANDS AFTER EACH USE***
