

Operating Instructions

Wifi Mattress Protector Electric Blanket

Model: GPEBSQ & GPSQ Series

Wifi – Downloading and Setting up APP

This APP is supported only on 2.4GHz Wifi channels.

The Goldair app and device pairing process require your 2.4ghz connection to be separated from your 5ghz connection. For instructions on how to do this please contact your internet provider.

Please note, we endeavour to keep our app up to date as devices and software continue to adapt and evolve. However, with ever changing technology and software we cannot guarantee as models age that their Wifi operation will continue to be supported. If you feel like the day-to-day functionality of your app is impacted, please contact our customer services team.

Download Goldair mobile APP

- Open the APP Store or Google Play on your mobile phone.
- Open 'Search' and enter 'Goldair'
- Click 'GET' and begin to download and install.

Once downloaded to your phone open the APP

- Tap REGISTER near the bottom of the screen.
- Read and agree to the Privacy Policy.
- Add your email address.
- Tap 'Obtain verification code'

You will then receive an email with a verification code.

- Enter the verification code from your email.
- Create a password.
- Then tap confirm.

If you haven't received a verification code via email, tap the resend button and when the verification code is received follow above steps.

Your APP is now registered and ready for pairing to your device.

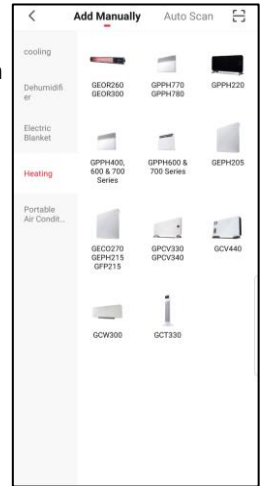

Pairing APP to Device

Connect with 2.4ghz Wifi Network

On the Home screen, tap 'Add Device' or the '+' icon.

Using the categories on the left, navigate to your device and tap on the image.

Confirm you are connected to a 2.4ghz network. If your 2.4ghz and 5ghz networks are dual banded, click 'Common router setting method' on how to split, or contact your internet provider.

Pairing APP to Device

Connect with 2.4ghz Wifi Network: EZ Mode

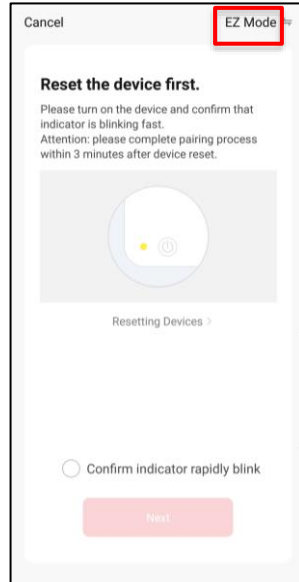

See instructions below to finalise your device pairing via EZ mode.

The app will default to EZ Mode in the right hand corner.

Ensure your device's Wifi LED is flashing rapidly.

If it is not, hold down the "TIMER" button for 5 seconds or until the Wifi icon begins to flash.

Click 'Confirm indicator rapidly blink' and 'Next'

Your device will now pair with the app.

Please ensure your device, modem and phone are as close together as possible and that your 2.4ghz Wifi signal is strong.

Once the device has paired, choose to rename it by tapping the Pen icon

Choose the most suitable room type and click 'Done' in the top right hand corner.

Pairing APP to Device

Connect with 2.4ghz Wifi Network: AP Mode

See instructions below to finalise your device pairing via AP Mode.

Change 'EZ Mode' to 'AP Mode' by clicking in the top right hand corner
Ensure your device's Wifi LED is flashing slowly.
If it is not, hold down the "TIMER" button for 5 seconds or until the Wifi icon begins to flash.
Click 'Confirm indicator slowly blink' and 'Next'

Click 'Go Connect' to connect to the device's Hotspot by selecting the network highlighted on the screen in your app, e.g. 'SmartLife- XXXX'

Select the device's Hotspot network and you will be returned to the app. If not, navigate back to the Goldair app.
Note- if you get a notification saying 'Internet may not be available' press Dismiss.

Your device will now pair with the app.

Please ensure your device, modem and phone are as close together as possible.

Once the device has paired, choose to rename it by tapping the Pen icon 

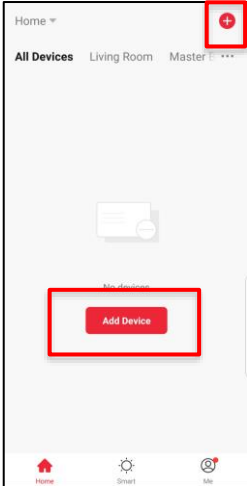

Choose the most suitable room type and click 'Done' in the top right hand corner.

Pairing APP to Device

Connect with Bluetooth

As an alternative way of connecting your device, you can pair via Bluetooth. Please ensure you have Bluetooth switched on on your mobile phone.

On the Home screen, tap 'Add Device' or the '+' icon.

Ensure your device's Wifi LED is flashing rapidly.

If it is not, hold down the "TIMER" button for 5 seconds or until the Wifi icon begins to flash.

On the top right, click 'Auto Scan'

The app will now scan for Bluetooth devices.

When your device appears, click on the image.

Choose your 2.4ghz Wifi network and add in the password. Click 'Next'

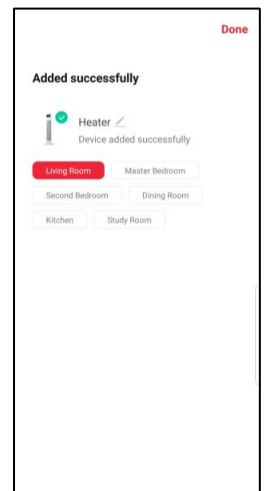

Your device will now pair with the app.

Please ensure your device, modem and phone are as close together as possible.

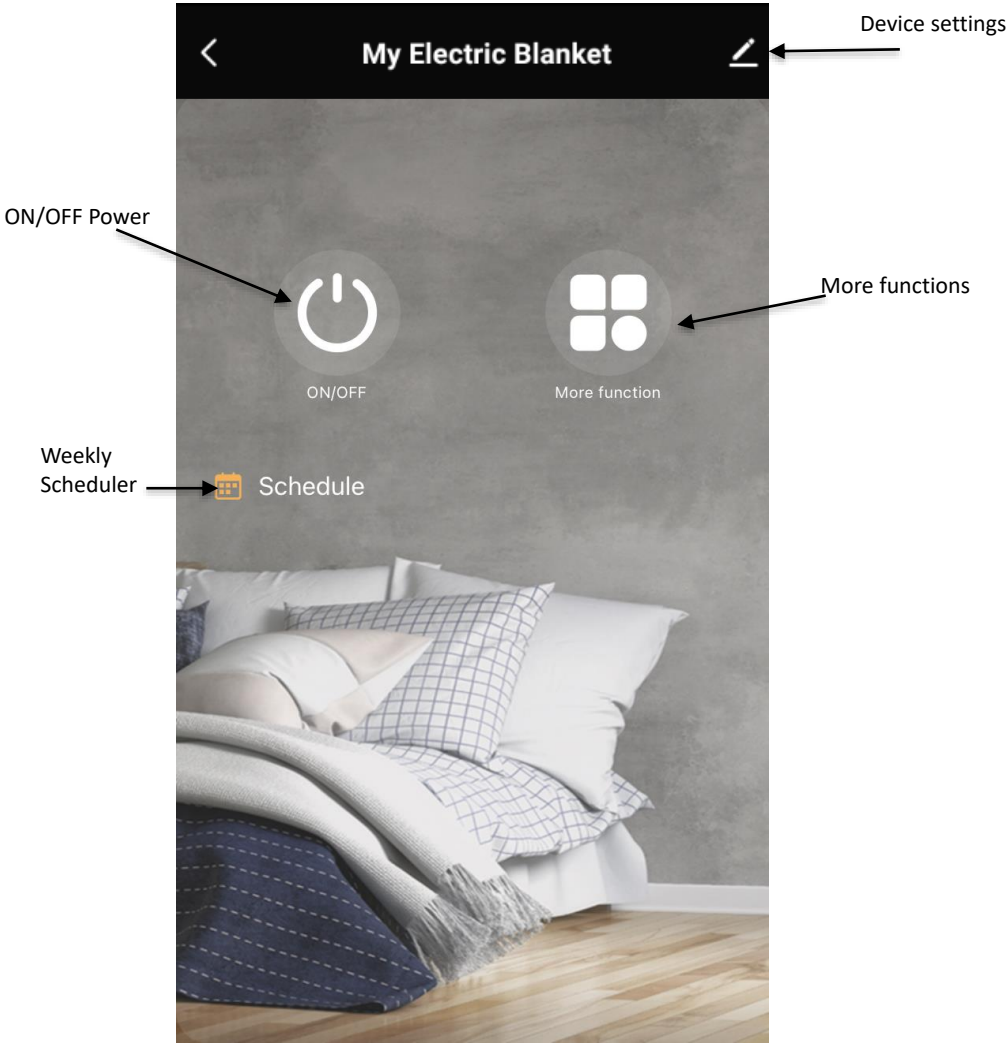

Once the device has paired, choose to rename it by tapping the Pen icon

Choose the most suitable room type and click 'Done' in the top right hand corner.

Operating your Electric Blanket from the APP

Electric Blanket operation screen

Operating your Electric Blanket from the APP

Electric Blanket operation screen

The screenshot shows the 'My Electric Blanket' app interface. At the top, there is a back arrow on the left and a settings icon on the right. Below the title is an illustration of a bed with a blanket. Underneath the bed, there are two radio buttons labeled 'Body' and 'Foot'. Below these are three sliders: a heat setting slider (set to 0), a countdown timer slider (set to 1h), and a remaining time display (01hour00min). Annotations with arrows point to various elements: 'Device settings' points to the settings icon; 'Choose between Body and Feet mode' points to the radio buttons; 'Choose heat setting for Body or Feet mode (1-6)' points to the heat slider; 'Choose between Body and Feet ON/OFF Timer (1-12 hours)' points to the countdown slider; and 'Countdown timer in real time' points to the remaining time display.

Body

Foot

Choose heat setting for Body or Feet mode (1-6)

Choose between Body and Feet ON/OFF Timer (1-12 hours)

Countdown timer in real time

Remaining Time 1 01hour00min

Operating your Electric Blanket from the APP

ON/OFF

- Tap to turn the blanket ON/OFF

MORE FUNCTIONS

- Tap to open the function screen

BODY TEMPERATURE SETTING

- Tap “Body” to enter the Body controls and it will turn orange.
- Amend the heat setting function to the desired heat setting. To turn ON, choose between 1-6. To turn off, choose 0.
- As soon as you turn the heat setting ON, the top part of the bed image will turn orange, indicating that the heat is on.

COUNTDOWN TIMER

- While in Body controls, you can amend “Countdown 1” between 1-12 hours to turn the blanket ON/OFF.
- You will see the remaining time countdown until the timer gets to 0 and the blanket turns ON/OFF

FEET TEMPERATURE SETTING

- Tap “Feet” to enter the Feet controls and it will turn orange.
- Amend the heat setting function to the desired heat setting. To turn ON, choose between 1-6. To turn off, choose 0.
- As soon as you turn the heat setting ON, the bottom part of the bed image will turn orange, indicating that the heat is on.

COUNTDOWN TIMER

- While in Feet controls, you can amend “Countdown 2” between 1-12 hours to turn the blanket ON/OFF.
- You will see the remaining time countdown until the timer gets to 0 and the blanket turns ON/OFF

Note: If you purchased a blanket with more than one controller, you will need to pair the app to both controllers to set each side of the bed.

Operating your Electric Blanket from the APP

This electric blanket comes with a weekly scheduler function.

WARNING- When using the schedule function, we recommend setting the timer to 2 hours (MAX) to minimise run time if accidentally left on unattended.

Note- in order for the scheduler to work, your blanket must be in standby mode (press ON on the app main screen which defaults to 0 heat levels.

Click Add Schedule to get started.

Using the time scroller, select the desired time that you want your blanket to turn ON.

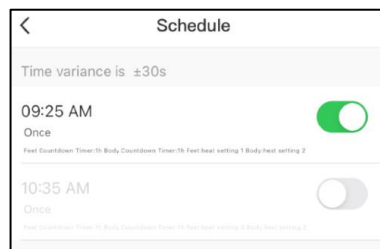

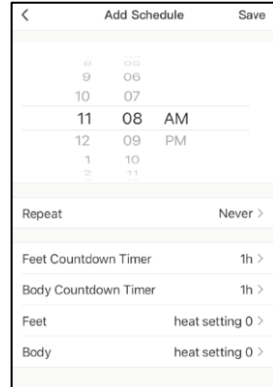

Click 'Repeat' to choose the days of the week you want your scheduler to occur on. Leave as 'Never' if you want to create a one-off schedule.

Click on Body and Feet Countdown Timer to respectively choose how long you want the blanket to be on for before it turns off (choose between 1-12 hours). It will default to 1 hour if you decide not to choose anything. We recommend that you choose a maximum of 2 hours.

Click on Body and Feet to respectively choose the heat setting (choose between 1-6 heat settings).

Click Save.

Your schedule will be Saved on the main screen of the Schedule function for you to keep track of. To set any additional schedulers, please click Add Schedule and repeat the process.

Set up Tap-To-Run & Create Smart Scenes

Store your favourite settings or set up automated functions based on conditions in the 'Smart' part of your Goldair app.

Warning- you must remember to turn off any Smart functions prior to leaving the house or going away. We recommend you only operate your Goldair devices when someone is on the premises.

- Tap 'Smart' on the bottom of your mobile phone.
- Tap 'Create Scene' or the '+' icon on the top right.

Click 'Launch Tap-to-Run' to save your preferred settings on your devices to launch at the click of a button. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'

Review your conditions and tasks on this screen, or choose to add another device or task by clicking the '+' icon.

Click Save to store your settings and your new task will appear on the Smart homepage. Click it to operate your desired task.

Set up Tap-To-Run & Create Smart Scenes

As well as setting up automated Tap-to-Run tasks, you can set conditions to operate your devices.

Weather:

Click 'When weather changes' to create a task based on your local outside weather. Choose between temperature, humidity, weather type, sunset/sunrise or wind speed. Select your desired condition and click 'Next'. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'. Review your conditions and click save. Your automation will appear on the main Smart homepage.

Schedule:

Click 'Schedule' to create a task for your device at selected times of the day. Click 'Repeat' to choose days of the week or leave as 'Once' to operate as a one off. Choose your desired time from the scroll bar and click 'Next'. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'. Review your conditions and click save. Your automation will appear on the main Smart homepage.

Status Change

Click 'When device status changes' to create a condition based on any function on your device, for example turning the Power Off when any device function is changed (to act as a child lock)

Voice Control

Once your smart scenes are set up, you can use Amazon Alexa or Google Home Routines to operate the scenes via voice control. Refer to your Amazon or Google Home user guides for instructions on how to pair your routine to smart scenes.

Operating your Device from the APP

Device settings:

The screenshot shows the settings for a device named "Heater" located in the "Living Room". The settings are organized into several sections:

- Header:** "Heater" (Room: Living Room) with an edit icon for name, location, and image.
- Device Information:** View your device information.
- Tap-to-Run and Automation:** View your tap-to-run and smart scene automations.
- Third-party Control:** Includes "Alexa" and "Google Assistant" icons. An arrow points to this section with the text: "View compatible Voice Control devices & instructions on setting up."
- Device Offline Notification:** Includes a toggle for "Offline Notification". An arrow points to the toggle with the text: "Turn on notifications for when device goes Offline."
- Others:** Includes "Share Device", "Create Group", "FAQ & Feedback", "Add to home screen", "Check Device Network", "Device Update", and "Remove Device".
 - "Share Device": "Share device with family (see instructions on next page)".
 - "Create Group": "Create group of devices (see instructions on next page)".
 - "FAQ & Feedback": "Read FAQs & submit feedback".
 - "Add to home screen": "Add device shortcut to home screen".
 - "Check Device Network": "Review device network".
 - "Device Update": "View device updates & turn on automatic updates".
 - "Remove Device": "Remove device from app".

Operating your Device from the APP

Share device with family member:

- The person you add will need to have the Goldair APP installed on their phone.
- Enter your family member's details to share device operation with them.
- Tap 'Confirm' to complete the addition.

Remove family member from device:

- Tap 'Share Devices' to delete the number of the person you want to cancel. Tap 'Confirm' to confirm.

NOTE: There can only be one user operating the device at a time. The APP needs to be closed on all other devices to enable the sharing to work.

NOTE: If someone else sets up their phone on the same device without using the 'Device Sharing' the original phone will be disconnected and the device will disappear from the device list.

Dismiss group

How to connect to your Alexa devices

- Download the Goldair App and pair your device.

Note: change the name of the device to an easily identifiable name such as 'Bedroom Fan' or 'Living Room Heater'

Note: Ensure you have downloaded and have configured the Amazon Alexa app. Please see your Alexa device's user manual for instructions.

- On the main page of the Alexa app, click the 'More' icon in the bottom right hand side of the page. Click on 'Skills and Games'
- Click on the search icon in the top right hand corner

- Click on the search icon in the top right hand corner

How to connect to your Alexa devices

- Type 'Goldair' in the search bar and click to proceed.

- Click 'Enable to use' and type your phone number/ email address and password and click 'Link Now'

- Click 'Authorise' and go back to the Home screen. Your devices will now appear and you can operate using voice control.

How to connect to your Alexa devices

SUGGESTED VOICE COMMANDS

Note: Amazon and Google are in control of voice control functionality and terminology. Not all functions available via the controller or APP can be controlled via voice command.

Voice control on your electric blanket will allow you to turn your blanket ON and OFF and set the heat settings for Body and Feet zones. Suggest voice commands to work with your Alexa device are:

Turning ON/OFF

Alexa, turn "Device Name" ON

Alexa, turn "Device Name" OFF

Setting BODY heat setting

Alexa, turn "Device Name" to 6 (omit 6 with the required heat setting between 1-6)

Setting FEET heat setting

Alexa, turn "Device Name Level 2" to 6 (omit 6 with the required heat setting between 1-6)

How to connect to your Google Home devices

Follow the below instructions to connect your device to Google Home.

- Download the Goldair App and pair your device.

Note: change the name of the device to an easily identifiable name such as 'Bedroom Fan' or 'Living Room Heater'

Note: Ensure you have downloaded and have configured the Google Home/Assistant apps. Please see your Google device's user manual for instructions.

- On the main page of the Google Home app, click the '+' icon in the top left hand side of the page.

- Click 'Set up device'

How to connect to your Google Home devices

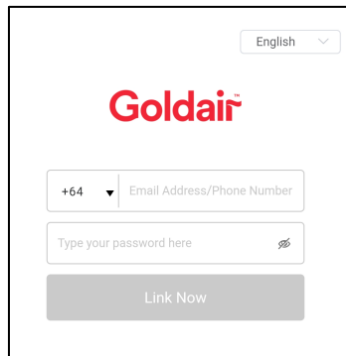

- Click 'Works with Google'

- Type 'Goldair' in the search bar and click to proceed.

- Type your phone number/ email address and password and click 'Link Now'

How to connect to your Google Home devices

- Click Authorise and all devices from your Goldair App will appear on screen.

- You have the option to add these to a particular room in your home
- When you go back to the Home screen, your devices will now appear and you can operate using voice control.

SUGGESTED VOICE COMMANDS

Note: Amazon and Google are in control of voice control functionality and terminology. Not all functions available via the controller or APP can be controlled via voice command.

Voice control on your electric blanket will allow you to turn your blanket ON and OFF and set the heat settings for Body and Feet zones. Suggest voice commands to work with your Google Home device are:

Turning ON/OFF

OK Google, turn "Device Name" ON
OK Google, turn "Device Name" OFF

Setting BODY heat setting

OK Google, turn "Device Name" to 6 (omit 6 with the required heat setting between 1-6)

Setting FEET heat setting

OK Google, turn "Device Name Level 2" to 6 (omit 6 with the required heat setting between 1-6)
