

VISTAGATO

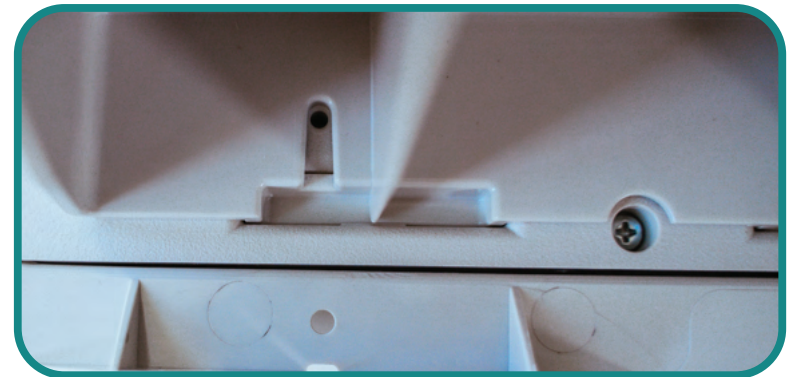

VISTALOO

EASY INSTALLATION IN JUST 10 STEPS!

Congratulations! Thank you so much for your thoughtful purchase of your new VistaGato or VistaLoo, and for investing in your pet's safety, enjoyment and comfort.

1. Position porch tabs at an angle. Then insert porch tabs into back panel slots. Then rotate porch downward and snap porch tabs into bottom panel slots.

2. Turn Vista upside down to screw both #8 x 5/8" long screws through porch slots into panel holes. This will secure the porch.

- 3.** Hold enclosure handle at all times while securing the Vistas onto window.

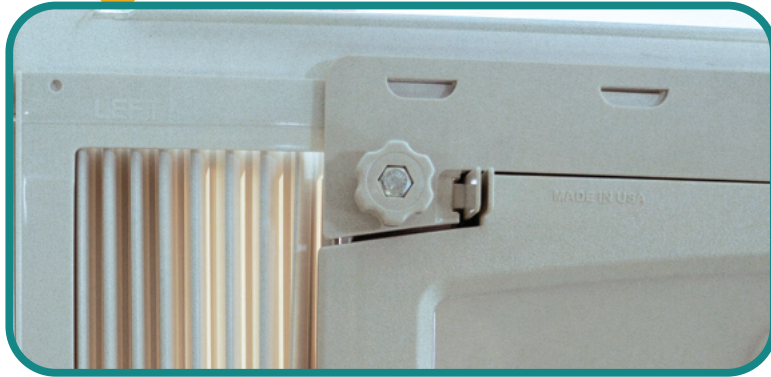

- 4.** Position both bottoms of side panels into bottom of window channel track.

- 5.** Pull window down onto Vista placing window between enclosure and clamp.

- 6.** Rotate both knobs clockwise to tighten clamps onto back of window. This will secure the Vistas tightly into place.

- 7.** Pull both right and left adjustable side panels outward into the window channels to close up any gaps between the Vista and the window frame.

- 9.** Optional. Privacy door snaps on and off back panel. For ease of training your cat to enter and exit the Vistas.

- 8.** For access into the enclosure. Squeeze both tabs together and pull back tabs simultaneously to open access panel.
