Inbuilt Series

## SYDNEY GAS LOG FIRE CLEARANCE CENTRE

### Variety

The Illusion Luminar Inbuilt Series of Gas Log Fires is available in 4 distinct sizes including the compact LC-1000, midrange LC-2000, the larger LC-3000, the wide LC-4000 (Inbuilt only) and the ultra wide LC-6000. A fantastic new range of body and fascia colours as well as traditional matt black, and brushed stainless steel makes choosing the right Luminar for your home a pleasure.

Luminar 1000

The Illusion Luminar Inbuilt range can be installed in suitably sized existing or new fireplaces, purpose built cavities, or even through existing walls. With 5 sizes there's bound to be the ideal solution for your home. Our showroom consultants can advise you which size Inbuilt Luminar is best suited to your requirements so that all you need worry about is colour!

### Function

With a firebox designed to maximise visual appeal, auto fan on/off function, fire on/off fingertip control conveniently located on the side of the fascia and optional remote operation, the Illusion Luminar Gas Log Fire puts the control in your hands.

Luminar 3000

The Illusion Luminar Inbuilt features the most life like logs available, with a level of realism others only aspire to. Our stylish fascias frame an enormous ceramic glass viewing area.

Bring your plans in and let our friendly staff work with you to ensure the end result is all you expect and more!

### Style

Aesthetically pleasing, with logs moulded directly off Australian hardwood you won't find a more realistic gas log fire anywhere. Clean burning gas without the hard work!

### Peace of Mind

Fully tested and approved to Australian Standards, you can rest assured the Luminar Inbuilt Gas Log Fires are built with the safety of you and your family a priority. All Luminar Gas Log Fires are sealed units which draw combustion air for the fire from outside the building.

Luminar 6000  
Dual Fan

The all new Illusion Luminar Inbuilt Gas Log Fires are available in a huge range of colours including Black Ace, Sterling, Granite, Pearl White, Scintillation and Brushed Stainless Steel. Combined with Brushed Stainless Steel or Matt Black door trims and the decor possibilities are almost endless!

Clever fascia design incorporates a convenient rocker switch allowing you to turn the appliance on or off quickly. An optional remote control allows you to adjust the Luminar Gas Log Fire to suit your own comfort levels.

Luminar 2000

There's nothing quite like sitting back, relaxing while you watch the flickering flames of a log fire and the new Luminar range of Gas Log Fires is no exception, providing that experience, but with the convenience of Gas. With such an enormous glass viewing area it's easy to be mesmerised! Ask for home inspection today and have one of our Experienced consultants advise you on which Inbuilt Luminar is best suited for your home.

Luminar 4000

The latest addition to the Luminar range is the Ultra wide LC-6000 boasting one of the largest viewing areas available in a gas log fire. The LC-6000 features not one, but two dual rotor blowers to ensure maximum heat distribution across the expansive firebox and into your home. Capable of heating larger areas the Illusion LC-6000 sets new standards in Gas Log Fires.

### Installation

The Illusion Luminar INBUILT Series can be installed with either a rear mounted or top mounted flue system.

### Balanced Flue

For your safety, the combustion air for the fire is drawn from our balanced flue system. Using natural convection by drawing air from outside the building, it provides flexible and comfortable warmth.

A non balanced flue requires constant ventilation to keep it burning and can make the room stuffy.

In contrast, a balanced flue gas fire is room-sealed using a glass front. It has a sophisticated flue that uses natural convection to draw the air from outside the building for combustion and expels it back to the outside through a separate compartment of the flue.

### 10 Year Warranty

The Illusion Luminar Series of Gas Log Fires come with a **ten year** warranty on the firebox. All other components are warranted for 12 months from the date of purchase.

### Australian Made

ILLusion Gas Log Fires are designed and made in Australia and utilise the finest available materials and processes to produce a uniquely Australian product. No other locally made gas log fire can compare to an ILLusion Gas Log Fire.

Illusion Australia Pty. Ltd. is a wholly Australian owned and operated Company. All ILLusion gas log fires are manufactured in Australia to exacting standards.
