

STELLAR

Kayaks & Surf Skis

The Stellar Falcon Surfski: An amalgamation of the SEA, SEI G2 and S18SX. High stability and low wetted surface area and improved rocker and stern fairing makes this boat fast on the flats and agile in the swell. The 3rd generation seat has a very rounded back to eliminate hot spots and increase rotation for a more powerful stroke. With an optimized rudder position and a more rounded keel in the stern, the Falcon is a very agile boat, similar to that of a much shorter Surfski. Innovative features include water shedding bow and stern handles, inboard set cockpit handles and an improved volume in the bow deck for a drier ride. If you want a boat for all conditions – this is it!

FALCON Surf Ski

Length: 19' 6" / 5.95m

Beam: 18.7" / 47.5cm

- 1: Streamlined bow & stern handles and recesses
- 2: Extra volume in the deck to shed water
- 3: Big cutaway for a tight catch
- 4: Dual Footbase setting for paddler height range
- 5: Water bottle holder and venturi drain
- 6: 3rd generation rounded seat for good rotation & comfort

- 7: Bungee Deck lines for storing gear
- 8: Overstern steering fittings
- 9: Ample stern rocker & rounded keel for excellent steering
- 10: Standard understern steering
- 11: High gunwales at feet for a dry ride and low at the bucket for easier re-entry
- 12: Slender bow for reduced drag
