

## MODIFICATION USER INSTRUCTIONS

Huawei CPE PRO 3 4G B628 Router Instructions:

### Warranty Notes:

- This modification voids all warranty rights with manufacturer and therefore shall not be returnable under warranty to the manufacturer.
- Do not open the unit once modified, doing so may damage the new antenna outputs as they have been positionally placed within the unit and therefore any attempt to open the unit causing damage to the outputs are a chargeable repair.

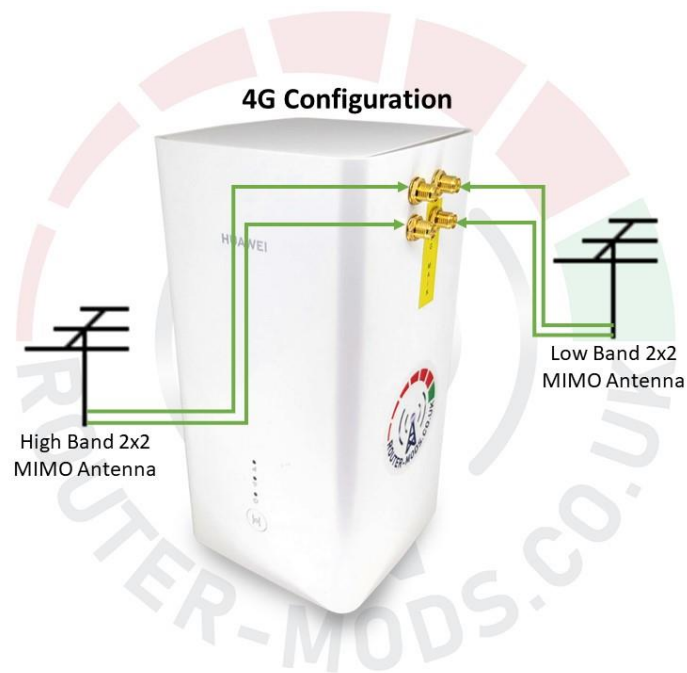

### Antenna notes:

- The internal antennas are no longer functional as they are now converted for external antenna use.

### Software Configuration:

- There has been No firmware/software adaptations to the router for the modification process.
- During testing of the modification testing process the router may have been restored to factory default setting, any setting that were previously on the unit have been lost.
- (if your unit has factory antenna outputs) Please ensure within the software you have selected "use internal antenna" this ensure this uses the new modified antenna outputs and does not automatically switch to the factory antenna outputs.

This modification will allow the use of the new external inputs in the below configuration.
