June 2019

Description:

Roof Rack Kit

Application:

Jeep Wrangler JL

Part No. & Barcode:

Refer to Table on Page 2

Fitting:

1 Hour

Availability Date:

June 1st, 2019

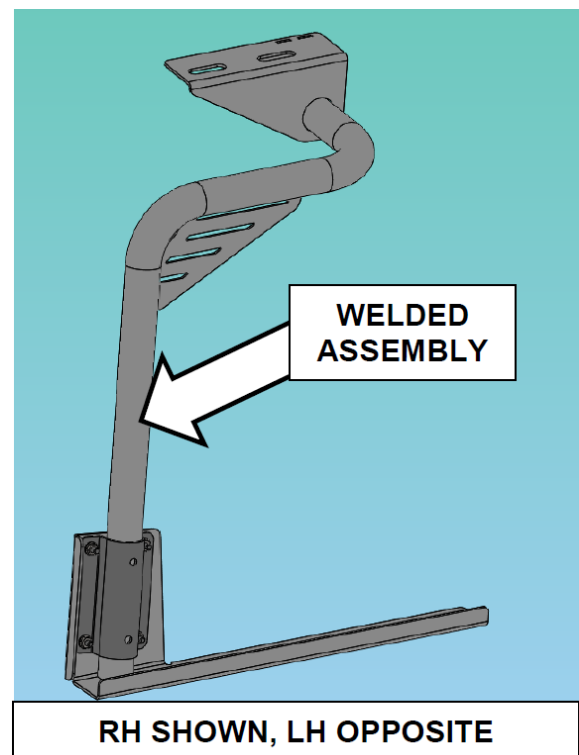

Product Specification

With the growing popularity of the Jeep Wrangler JL for overlanding and long distance travel, ARB has developed a Roof Rack Fitting Kit to fit in conjunction with ARB's range of roof racks. The fitting kit uses the strength of the Wrangler JL roll cage and tub to evenly distribute the load.

ARB's Roof Rack mount kit achieves the load rating of 287lbs by mounting directly to the vehicle roll cage and the top of the vehicle tub section. The internal frame kit is mounted with a combination of M6, M8, and M10 fasteners and includes rubber gaskets for the mount holes required to be drilled into the factory hardtop.

The Wrangler JL Roof Rack Fitting Kit is available in a 'kit' with roof rack to specifically suit the vehicle, in both steel and alloy with mesh.

Protection and Styling Characteristics:

- Vehicle-specific design to suit the Jeep Wrangler JL Unlimited with factory hardtop.

Note: Not suitable for vehicles fitted with a soft top or Sky One-Touch™ Power Top

- Durable steel construction for maximum strength
- Maximum carrying capacity of 287lbs evenly distributed and adequately secured
- Internal frame utilizes 35mm gusseted tube work
- 3mm laser cut and folded sheet steel used for other bracketry
- Weight of the roof rack fitting kit is approximately 53lbs (excluding roof rack)
- Internal componentry finished in Integrit-textured black powder coat. External componentry finished in millennium grey powder coat to match the ARB Roof Rack
