Digital Nitrous Pressure Gauge

Part # 00-63015

1. Features:

- LCD Display
- Automatically records max pressure value
- 5 Units of measurement: psi, bar, kpa, Mpa, kg/cm2
- 0-15 minute auto shutoff feature
- Micro-power consumption, 2,000 hour battery life
- Parameter correction, correct zero and error in field application
- Sample rate: 4x per second

2. Specs

Pressure Range	0-1500PSI	Accuracy	.20%
Overload Capacity	200%	Battery Voltage	9VDC
Display	LCD	Display Range	-1999 - 9999
Mounting Thread	1/4" NPT	Interface Material	Stainless Steel

3. Changing Settings:

- On/Off: short press "ON/OFF" button
- Change unit of measurement: long press "ON/OFF" button
- Clear peak value: short press "ZERO" button
- Clear showing value: long press "ZERO" button
- Auto-off time setting: Press the "ZERO" and "ON/OFF" at the same time, when small screen shows "LOCL" enter 1000 (short press "ZERO" to modify the current flashing values, long press "ZERO" to shift the digit, for example, from 000**0** to 00**0**0), press the "ON/OFF" button to confirm when the small screen shows "off" you can modify the current value to be your required automatic shutdown time, press "ON/OFF" button to confirm then finish this process.

   •00 = continuous operation with auto power-off function
   •01-15 = shut down after X minutes

NOTE: This gauge uses a 9V alkaline battery 6L61
