

WHAT IS ENDURaid

The only electrolyte drink specially formulated to fight fatigue

EndurAID is WorkWize's answer to the intense Australian climate and demanding work environments. It's not just a hydrator; it's a fatigue fighter.

This sugar-free, all-natural drink is ideal for tradies, shift workers, and anyone facing the rigors of long hours and tough conditions, ensuring safety and peak performance throughout the day.

WORKWIZE
SMART HYDRATION

FATIGUE

As certain neurotransmitter levels drop, so do your eyelids. EndurAID stops that.

AMINO ACIDS

Amino acids make neurotransmitters. So we made sure to pack our drink with them.

WORK DAY

Work can be tough. Your brain can lose up to 40% of those aminos during an average work day.

RESTORE

Stay safe. Refuel your brain. Fight fatigue with EndurAID.

REHYDRATES & FIGHTS FATIGUE

THE SCIENCE OF ENDUR AID

● Neurotransmission

The brain communicates using chemicals called neurotransmitters. All mental functions including concentration, alertness and motivation are fueled by these chemicals.

● Precursor Nutrients

The chemical fuel for these neurotransmitters is derived from food and pumped to the brain through the blood. These precursor nutrients are consumed during mental or physical work.

● Central Fatigue

When the fuel for these neurotransmitters runs low, it is difficult to concentrate and remain alert, drowsiness and feelings of fatigue will increase. This is termed central fatigue.

● Supplementation

Supplementing the fuel required to make them, can enable the body to make more neurotransmitters, allowing you to work more safely and comfortably during long shifts.
