

Our original Classic Rack has been fortified with Marine Grade 316 Steel and reinforced for public and outdoor use.

**SUITABLE FOR:
Road, hybrid and commuter bikes without fenders/mudguards.**

The Steadyrack Classic Rack Stainless Steel is simply our extremely successful and original Classic Rack, made from 316 stainless steel components, which makes it ideal for external installations where the racks are exposed to the elements. The rack stands up to the wear and tear of public usage and won't weather or rust from exposure.

This Steadyrack Classic enjoys all the features and benefits of our original Classic Rack and is the ideal solution for parking multiple bikes close together and maximising the bike parking potential of any site.

We are also able to produce custom colour schemes and finishes to our racks. Minimum quantities apply and prices will vary depending on finish and quantity.

Features high quality Marine Grade 316 stainless steel.
Low maintenance, weather proof and vandal resistant.

SAVES SPACE
