

AHS SLIPPER SOCKS

Fall prevention is a serious issue, and many caregivers may not be aware of the dangers that come with it. AHS anti-slip socks offer an excellent solution for those at risk of slipping and falling or for individuals looking for comfortable grippy protection. Our slipper socks are treaded with grips on both sides making them easy to put on or take off.

Patient satisfaction is a priority in the creation of AHS slipper socks. The patient's feet are encased in plush luxury thanks to the high-quality lining and soft woven material. In addition, the stretchy polyester/spandex fabric offers comfort for patients from pre-operative settings to home.

Our slipper socks feature extremely elastic cuffs for a snug, comfortable fit and come in a wide range of sizes. In addition, patients who require dressings for foot or ankle wounds benefit significantly from a bariatric (extra large) design.

For maximum traction and safety, AHS premium hospital socks soles are imprinted to the tip, making them ideal for areas where you could be at risk of slipping and falling. The poly/spandex knit used in the production of AHS slipper socks is exceptionally comfortable and allows your feet to breathe.

Features

- Excellent aid for avoiding injuries from falls
- Flat, non-slip, and better gripping sole
- Premium lining in these cozy slippers keeps feet warm and dry
- Latex-free construction
- Surface-gripper tread to prevent slips and falls
- Dual sided tread: patients benefit from the convenience and ease of double sided grip
- The cuffs and body of sizes have an elastic design to ensure maximum comfort and fit
- Available in different colors: Blue, Gray, Yellow, and Assorted (Blue, Gray, Yellow)
- Multiple sizes: One-size fits most (small-large) / extra large (XL – bariatric)
- Double threaded (threading on both sides of sock) allows for easier slip-on and removal
- Falls Prevention: color-coded socks provide staff with easy identification of patients at high risk of falls
