# Safety Data Sheet

## **Granular Urea**

# 1. Product and company identification

Product name Synonym Product type Code	::	Granular urea UREA Solid [granula PA385G	tes]		
Uses					
Area of application Material uses	:	Professional a Fertilizers.	pplications		
Supplier					
Supplier's details		Kohi Chem Sł	юр		
Address					
Street	:	725 Evans Cor	urt		
Number	:	V1X 6G4			
Postal code	:	Kelowna, BC			
City	:	Canada			
Country	:	+1	866	491	0255
Telephone number	:				
Fax no.	:	support@kohi	chemshop.ca		
e-mail address of person	:				
responsible for this SDS		24 Hour Emer	gency Service, (C	Canutec 613-996-	6666)
Emergency telephone number (with hours of operation)	:				

# 2. Hazards identification

#### **Emergency overview**

Physical state	:	Solid [granulates]
Color	:	White.
Odor	:	Odorless.slight, ammoniacal
Hazard statements	:	NOT EXPECTED TO PRODUCE SIGNIFICANT ADVERSE
		HEALTH EFFECTS WHEN THE RECOMMENDED INSTRUCTIONS

		FOR USE ARE FOLLOWED.
GHS label elements		
Signal word	:	No signal word.
Hazard statements	:	No known significant effects or critical hazards.
		č
Detential soute health offects		
Fotential acute health effects		
Inhalation	:	Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
Ingestion	:	No known significant effects or critical hazards.
Skin	:	No known significant effects or critical hazards.
Eyes	:	No known significant effects or critical hazards.
Potential chronic health effects		
Chronic effects	:	No known significant effects or critical hazards.
Carcinogenicity	:	No known significant effects or critical hazards.
Mutagenicity	:	No known significant effects or critical hazards.
Teratogenicity	:	No known significant effects or critical hazards.
<b>Developmental effects</b>	:	No known significant effects or critical hazards.
Fertility effects	:	No known significant effects or critical hazards.
<b>Over-exposure signs/symptoms</b>		
Inhalation	:	No specific data.
Ingestion	:	No specific data.
Skin	:	No specific data.
Eyes	:	No specific data.
Medical conditions aggravated by over-exposure	:	None known.

See toxicological information (section 11)

## 3. Composition/information on ingredients

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid measures		
Eye contact	:	Rinse with plenty of running water. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Skin contact	:	Wash with soap and water. Get medical attention if irritation develops.
Inhalation	:	If inhaled, remove to fresh air. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Ingestion	:	Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Get medical attention if you feel unwell.
Protection of first-aiders	:	No action shall be taken involving any personal risk or without suitable training.
Date of issue : 07/01/2022		Page:2/9

Notes to physician	:	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
5. Fire-fighting measures	8	
Flammability of the product	:	No specific fire or explosion hazard.
Extinguishing media		
Suitable	:	Use an extinguishing agent suitable for the surrounding fire.
Not suitable	:	None identified.
Special exposure hazards	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Hazardous thermal decomposition products	:	Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides Avoid breathing dusts, vapors or fumes from burning materials. In case of inhalation of decomposition products in a fire, symptoms may be delayed. ammonia
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Special remarks on fire hazards	:	Non-flammable.
Special remarks on explosion hazards	:	Non-explosive.

	6.	Accidental	release	measures
--	----	------------	---------	----------

Personal precautions Environmental precautions	:	training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment (see Section 8). Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up		
Small spill	:	Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see section 1 for emergency contact information and section 13 for waste disposal.

## 7. Handling and storage

Handling	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Storage	:	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

## 8. Exposure controls/personal protection

#### **Occupational exposure limits**

No exposure standard allocated.

Consult local authorities for acceptable exposure limits.

Engineering measures	:	No special ventilation requirements. Good general ventilation should be
		sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process
		enclosures, local exhaust ventilation or other engineering controls to keep
		worker exposure below any recommended or statutory limits.
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of
		the working period. Wash contaminated clothing before reusing. A
		washing facility or water for eye and skin cleaning purposes should be present.
Personal protection		
Respiratory	:	Use a properly fitted, particulate filter respirator complying with an
		approved standard if a risk assessment indicates this is necessary.
		levels, the hazards of the product and the safe working limits of the
		selected respirator.
Hands	:	Chemical-resistant, impervious gloves complying with an approved
		standard should be worn at all times when handling chemical products if
		a risk assessment indicates this is necessary.
Eyes	:	Safety eyewear complying with an approved standard should be used
		when a risk assessment indicates this is necessary to avoid exposure to
Skin		Personal protective equipment for the body should be selected based on
	•	the task being performed and the risks involved and should be approved
		by a specialist before handling this product.
Environmental exposure	:	Emissions from ventilation or work process equipment should be
controls		checked to ensure they comply with the requirements of environmental
		protection legislation. In some cases, fume scrubbers, filters or
		engineering modifications to the process equipment will be necessary to
		reduce emissions to acceptable levels.
9. Physical and chemica	l prop	erties

- Physical state
- : Solid [granulates]

Flash point	:	Not applicable
Burning time	:	Not determined.
Burning rate	:	Not determined.
Auto-ignition temperature	:	Not determined.
Flammable limits	:	Lower: Not determined.
		Upper: Not determined.
Explosive properties	:	Non-explosive.
Oxidizing properties	:	None.
Color	:	White.
Odor	:	Odorless.slight, ammoniacal
Molecular formula	:	CH4N2O
рН	:	9.5 [Conc.: 100 g/l]
Poiling/condensation noint		Not determined
Bonnig/condensation point	•	Not determined.
Sublimation temperature		Not determined
Melting/freezing noint	:	134 °C (273 °F)
foreiting, it cozing point	•	
Density	:	1.33 g/cm3
Relative density		Not determined
Vapor pressure	:	$0.00016 \text{ hPa} @ 20 ^{\circ}\text{C} (68 ^{\circ}\text{F})$
vapor pressure	•	0.000010 m u e 20 e (00 1)
Odor threshold	:	Not determined.
Evaporation rate	:	Not determined.
Viscosity	:	Dynamic: Not determined.
	:	Kinematic: Not determined.
Solubility	:	Easily soluble in the following materials:
		cold water
Solubility in water	:	> 100 g/l

# **10. Stability and reactivity**

Chemical stability Conditions to avoid	:	The product is stable. Avoid contamination by any source including metals, dust and organic materials.
Incompatible materials	:	Urea reacts with calcium hypochlorite or sodium hypochlorite to form the explosive nitrogen trichloride.
Remark	:	Reactive or incompatible with the following materials: Oxidizing agents acids alkalis Nitrites and nitrates
Hazardous decomposition products Possibility of hazardous reactions	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced. Under normal conditions of storage and use, hazardous reactions will not occur.

# 11. Toxicological information

#### Information on toxicological effects

Acute toxicity		
Conclusion/Summary	:	No known significant effects or critical hazards.
Chronic toxicity		
<u>Conclusion/Summary</u>		No known significant effects or critical hazards

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of

untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

#### **Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.**
