

MICRO MINI LOG CABIN EGG

BY LESLEY CHAISSON OF BERRY BIRDY DESIGNS

Cut a piece of batting and backing the size of the outer rectangle and layer with batting on top. Paper piece from the centre square and sew strips past the outer edges. Cut out the egg shape and trace onto paper pieced area. Sew through all layers along traced line. Trim the batting and backing as close to the stitching as possible. Sew rick rack around the edge. Cut a bias strip 1" wide X 16" long and sew it on carefully without pulling the binding while sewing using a 1/8" seam.

Fold binding to the back and hand sew down.
