## We believe in the power of botanicals – and always have.

Since 1989, Biocidin Botanicals™ has focused on providing botanical solutions for microbiome health. During those 30+ years, research on the microbiome has exploded, showing its vital connection to every system in the body.

An unhealthy microbiome? It's a risk factor for most chronic illnesses.

That means our focus not only makes sense – it's also essential to human health.

Best of all, our clinically effective, evidence-based botanicals address today's complex health needs with simplicity.

We offer a curated line of products that work and instructions that make sense.

Simple, natural solutions for our times.

## Our Mission

Empowering people to protect and support their health in the face of today's complex challenges.

## Meet Our Founder

From growing up in her family's pharmacy to earning a degree in Traditional Chinese Medicine to working as a clinical consultant for an herbal products company, Rachel Fresco has always been about helping people find answers to everyday health challenges.

She used her knowledge and experience in herbal medicine to create Biocidin® – a unique blend of 18 botanical extracts and essential oils with surprisingly effective broad-spectrum activity.

That was in 1989 when the word "microbiome" was just starting to be defined in scientific circles. Yet Rachel had produced one of the most powerful microbiome-balancing formulations ever analyzed by a leading U.S. diagnostic laboratory.

Thirty years later, Biocidin® is trusted by integrative and naturopathic doctors around the world. Biocidin Botanicals continues to add cutting-edge, targeted support products to our curated portfolio.

We are committed to offering powerful, natural solutions that address today's complex needs with simplicity.

RACHEL FRESCO  
FOUNDER AND FORMULATOR

## Core Values

### Caring

We nurture – with empathy and compassion – our employees, practitioner partners, and customers. Because how we treat others, ourselves, and this planet is another way of supporting and facilitating health for all beings.

### Wisdom

We trust in nature's intelligence combined with scientific validation. Relying on the holistic triad of clinical science, botanical traditions, and energetics, we develop, test, and verify our formulations.

### Collaboration

We collaborate with integrative and functional healthcare professionals, researchers, growers, and industry organizations. In partnership, we expand our knowledge of how botanicals support microbial health and enable our colleagues to advance their work.

# At Biocidin Botanicals,<sup>TM</sup> Microbes Matter Most<sup>TM</sup>

The term microbiome describes the microorganisms coexisting in our bodies – bacteria, viruses, fungi. The vast majority of microbes reside in the gastrointestinal tract. That’s why gut health is foundational care in Integrative Medicine.

But microbes also live in and influence other parts of the body. So it should come as no surprise that the oral microbiome is emerging as an imperative part of routine care.

Microbes and the microbiome play a vital role in whole-body health. But not all microorganisms bring benefits – balance is essential.

## Botanicals: The Natural Solution

At Biocidin Botanicals,<sup>TM</sup> we understand that microbes are not an enemy to be eliminated but an ecology to be nourished. How do we do that? By working with the gift of botanicals.

Each plant offers multiple activities – and when layered together in a formula – a powerful synergy occurs. Imagine the combination of microbiome-balancing support, augmented by activity against biofilms and protective antioxidant action. The outcome is not additive but exponential!

Botanicals offer a graceful and mighty solution that cannot be duplicated. The power to achieve and maintain balance.

The power to thrive.

## Powered by Biocidin<sup>®</sup> 18

Biocidin<sup>®</sup> is our founder Rachel Fresco’s answer to one of the most pressing health challenges of our time: the rise in antibiotic-resistant bacteria. A unique blend of 18 botanical extracts and essential oils, Biocidin<sup>®</sup> has stood the test of time and scientific scrutiny. Published and ongoing research confirms its efficacy. Year after year.

The genius of Biocidin<sup>®</sup>? It works with the microbiome to support health at the microbial level. Practitioners turn to it for its potent activities. Consider how it:

- Clears away unwanted microbes\*
- Spares beneficial microorganisms\*
- Dismantles biofilms\*
- Promotes healthy inflammatory response\*
- Functions as an immune adaptogen\*

The 18 botanicals in Biocidin<sup>®</sup> power six of our 10 products. We have also created additional cutting-edge, targeted support products to boost patient health and serve our family of healthcare professionals.

\*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

# Categories of Functional Activity

To make the pathway to wellness clear, our products are organized according to Categories of Functional Activity.

Choose the category that addresses your patient's needs, or create a support program with products from several categories based on your therapeutic target.

For those with professional accounts, our clinicians are always available to advise you.

## SMILE

### PROMOTE ORAL HEALTH.

That's why we've created one-of-a-kind oral health care products. Products with a systemic reach and demonstrated activity that clear away unwanted oral microbes and plaque (biofilms). Foundational Dentaceutical™ care – it all begins here.

## REMOVE

### CLEAR AWAY OBSTACLES.

Entrenched biofilms and unwanted organisms can create an obstacle that requires outside assistance. The vital first step is to clear away irritants, unwanted microbes, and biofilms – allowing the body's innate restorative ability to go to work.

## BIND

### INTERCEPT AND ELIMINATE TOXINS.

How can you make toxin removal safe and even comfortable? Pull out debris. Intercept and eliminate unwanted toxins and microbial byproducts. Detoxification done right.

## DEFEND

### OPTIMIZE RESILIENCE.

In the face of novel microbes, or if the body is weakened, we need to call in the troops. Humans have relied on plants for eons to balance and reinforce immune activity. To rouse the body's vital force. To prime the immune pump for opposition. Together, the body and botanicals bolster defenses to co-create optimal resilience.

## RESTORE

### BRING BALANCE AND HEALING.

Undesirable microbes create imbalances, even disorder. The effort to restore harmony requires ongoing renewal – and that's where our botanicals and nutrients shine.
