INSTALLATION INSTRUCTIONS

To conform with local bylaws

Your E.A.U. System is made so it snugly fits under the sink and can easily be connected to the mains water supply that's already present.

Water Source

For ease of installation we recommend fitting the E.A.U. system as close as you can to where the tap will be situated. Most customers fit the unit in the space directly under the kitchen sink.

If fitting a single filter tap, isolate the mains cold feed.

If fitting a triflow tap to replace your existing tap, isolate the hot and cold supplies.

Fit either the single or triflow taps.

Look for a suitable $\frac{3}{4}$ " washing machine shut off valve, via a Tee piece to the cold drinking supply. If not available use the supplied piercing valve (b*).

Alternately, you can use the piercing clamp supplied in the kit (a,b*).

Using the $\frac{1}{4}$ " pipe provided (d*), fit the $\frac{3}{4}$ female fitting supplied, to the washing machine valve or into the piercing clamp.

Use the $\frac{1}{4}$ " pipe (d*) to length and connect to the white isolator valve (c*), supplied, and then push fit the opposite end of the isolator valve in to the other pipe length which then pushes into the "IN" side of the filter box. See next page for ensuring pipe fitting is secure' to the end.

Insert $\frac{1}{4}$ " pipe (d*) into the "out / faucet" side of the filter box, (this is the longer $\frac{1}{4}$ " pipe) and insert into either the single filter tap or the filtered side of the triflow tap if installed. (f* fits on to the area pointed out by the arrow). See next page for ensuring pipe fitting is secure' to the end.

Make sure all pipes and fittings have been firmly pushed in and secure.

To Connect the Pipe to a fitting:

1. when pipe is inserted into each point a clip is required
2. Remove the lock if present (not present in self-locking fittings).
3. Push to insert the pipe firmly until it stops.
4. Pull the collet back slightly.
5. Replace the lock (if present).

Turn on the water at the isolation valve, making sure the ¼" shut off valve is turned ON. **Check for any leaks.**

Open filtered tap and dispense filtered water, allowing it to run for approx. 5 minutes.

Turn the tap off and your E.A.U. System is ready to dispense your quality drinking water.
