

# SAFETY AND INFORMATION MANUAL

Don't be a fool, keep your eye on the pool.

THE INFLATABLE POOL THAT WENT TO DESIGN SCHOOL

## IMPORTANT SAFETY RULES

READ AND FOLLOW ALL SAFETY INFORMATION AND INSTRUCTIONS. KEEP FOR FUTURE REFERENCE. FAILURE TO FOLLOW THESE WARNINGS AND INSTRUCTIONS CAN RESULT IN SERIOUS INJURY OR DEATH TO USERS, ESPECIALLY CHILDREN.

### WARNING

NO DIVING OR JUMPING - SHALLOW WATER

Diving or jumping may result in broken neck, paralysis, permanent injury or death.

Watch children at all times.

WARNING! Never leave your child unattended - drowning hazard  
Children under 5 are at highest risk of drowning.  
Closely watch children who are in or near this pool.  
Empty pool or prevent access when not in use.

WARNING! ONLY FOR DOMESTIC USE.  
WARNING! NOT SUITABLE FOR CHILDREN UNDER 36 MONTHS.

WARNING! CHILDREN CAN DROWN IN VERY SMALL AMOUNTS OF WATER. ADULT SUPERVISION IS REQUIRED.

WARNING! ONLY FOR OUTDOOR USE.  
WARNING! DO NOT INSTALL PADDLING POOL OVER CONCRETE, ASPHALT OR ANY OTHER HARD SURFACE.  
WARNING! DRAIN AND STOW AWAY PRODUCT WHEN NOT IN USE AT ALL TIMES.

# IMPORTANT SAFETY RULES

## PREVENT YOUNG CHILDREN FROM DROWNING:

Drowning occurs silently and quickly. It can occur in water as little as 2 inches within seconds.

Vigilance is paramount when children are in or near the water.

State or local laws or codes may require fencing or other approved barriers. Check state or local laws and codes before setting up pool.

Please refer to CPSC Pub. No. 362. "Safety Barrier Guidelines for Residential Pools" for a list of barrier recommendations and guidelines at [www.poolsafely.gov](http://www.poolsafely.gov).

Keep children in your direct sight when they are in or near pool and when you are filling and emptying pool.

When searching for a missing child, check pool first, even if you think your child is in the house.

Assign an adult to be responsible for watching children in the pool and have them wear the provided Water Watcher tag and ask they wear it the entire time they are in charge of supervising children in the pool.

If they need to leave for any reason, ask this person to pass the Water Watcher tag and the supervision responsibility to another adult.

Thread an appropriate length of string (approximately 20 inch/51cm long) through the hole and secure with knot. Ask the supervising adult to wear the Water Watcher tag around their neck.

## A WATER WATCHER IS:

- Assigned to watch children in the water, never leaving them unattended
- Regularly scans the bottom of the pool
- Avoids talking on the phone or engaging in distracting, poolside conversations
- Will call 911 and administer CPR in the event of an emergency
- Can locate and know how to use all pool safety equipment onsite

Replacement Water Watcher tags can be provided by emailing us at [hello@poolbuoy.co](mailto:hello@poolbuoy.co)

## PREVENT YOUNG CHILDREN FROM GAINING ACCESS TO POOL:

Empty the pool when not in use to prevent children from gaining unauthorised access and drowning.

Position furniture away from pool so that children cannot climb and gain access to pool.

When leaving pool, remove floats and toys from pool that might attract a child.

Do not remove any safety barriers until pool is completely empty and stowed away.

# IMPORTANT SAFETY RULES

## BE PREPARED TO RESPOND TO AN EMERGENCY:

Keep a working phone and list of emergency numbers near pool.

Become certified in cardiopulmonary resuscitation (CPR) so you can respond to an emergency.

## PLACEMENT OF POOL:

Portable pool should be set up to comply with local safety and building codes.

Do not to install the pool on a slope or inclined surfaces, on soft or loose soil conditions (such as sand or mud), or on an elevated surface such as a deck, platform or balcony, which may collapse under the weight of the filled pool.

The pool's location is important. The pool is best placed on grass or a soft surface, not hard or sharp surfaces.

Ensure the boxed pool is at the selected set up site before inflating.

Never drag an inflated pool along the ground as it may be damaged.

Before you inflate, please inspect the pool for any tears or punctures.

## ELECTROCUTION RISK:

Keep all electrical lines, radios, speakers and other electrical devices away from pool.

## GENERAL SAFETY WHEN USING POOL:

Water can be easily contaminated. Use fresh and clean water each time pool is used to maintain hygiene and prevent illness.

It is important to change the water of paddling pools frequently, particularly in hot weather or when noticeably contaminated.

Do not apply pressure to the inflated walls or straddle and lean on walls as flooding or injury could occur.

Do not place hard or sharp objects in pool which could puncture the inflatable walls.

Do not modify this product or use accessories not supplied by manufacturer.

Please follow Maintenance instructions to prevent damage beyond normal wear and deterioration. Deterioration can lead to pool failure which might cause large quantities of water to release from the pool, causing property damage or bodily injury.

Designed in Australia. Made in China.  
Distributed by RAEMAX USA Inc. for Pool Buoy  
5/62 Fallon Street, Brunswick VIC 3056, Australia.

Conforms to the requirements of ASTM F2666-16  
Model Numbers: 001PBLL, 002PBKS, 003PBWB,  
004PBGG, 005PBPP, 006PBCMJ, 007PBLSL

# A STEP BY STEP GUIDE

## INFLATING THE POOL:

**1.** There are two inflation points one for each ring and two valves on each inflation point. The black part of each valve is the main valve - air will come in and out of this valve. The clear part of that valve is just for further inflation. This is a one way only valve (genius) it will not deflate but allows you to top up to firm.

**2.** Start with the bottom ring first. The black part of the valve is the main valve so pull that out and insert the air pump or just get blowing (without passing out please).

**3.** Stop when firm and close over all valves. Repeat on top ring.

The pool may not be perfectly round on first inflation. Inflate the pool to full capacity on first use and fill up with water and all kinks should disappear.

Do not use high pressure pump to inflate.

Do not over-inflate.

## FILLING THE POOL:

Ensure the drain plug is securely plugged.

Slowly fill with clean, fresh water.

Do not overfill the pool as this may result in pool wall collapsing and flooding, causing safety issues and damage to property.

## MAINTENANCE:

Do not add chemicals or chlorine to the water. Keep out of direct sunlight to prevent fading from UV rays. Clean pool with cold soapy water and soft cloth. Harsh chemicals and abrasive brushes will damage pool material.

## EMPTYING AND STORAGE OF THE POOL:

When pool is not in use, water must be drained, and pool deflated by an adult.

Follow local regulations for disposing of pool water.

Deflate the pool after each use and ensure pool is completely dry before folding and storing in dry place to prevent damage beyond normal wear and deterioration.

Store in below room temperatures to protect valve seal damage.

## PARTS:

### Repair Patch

Two repair patches have been provided with this product for the repair of small holes and leaks.

### Vinyl Plastic Repair Kit Instructions:

**1.** Cut to the required size depending upon hole or puncture.

**2.** Thoroughly clean damaged surface and allow to dry for minimum of 10 minutes.

**3.** Remove vinyl patch from paper backing, press patch firmly over hole or puncture.

**4.** Do not inflate for 20 minutes.

If you require additional repair patches, please email us at: [hello@poolbuoy.co](mailto:hello@poolbuoy.co) and we will mail them out to you.

For immediate repairs, you may find a piece of heavy duty packing tape that is waterproof will work.

### Water Watcher Tags

Replacement Water Watcher tags can be provided by emailing: [hello@poolbuoy.co](mailto:hello@poolbuoy.co)
