

1. Battery Test
2. Starter Test
3. Safe Connection
4. Multi-language
5. Charging Test
6. Max Load Test

1. General Specifications

AUTOOL BT460 Car Battery Load Tester is dedicatedly developed to test 12V / 24V regular flooded , automotive lead-acid batteries, AGM flat plate, AGM spiral, GEL , and EFB batteries. Applying the advanced conductance testing technology, BT460 can give you accurate testing results in seconds. Fit in your glove box, It provides a handy device for automobile factory, garage, auto battery manufacturer, Pros and DIYers with a quick, simple and cost-effective solution.

2. Feature

1. Support Multiple Language: English, Russian, Spanish, French, German and Japanese etc.. Beside, it can be customized according to your requirements.
2. 4" large colorful TFT display.
3. Polarity reverse connection protection. Even if the power cord is wrongly connected, it will not burn the product, let alone damage your battery.
4. Can test 24V car battery, special for truck.
5. Easy to use and can see the result clearly.
6. Measurement Standard: base on the currently the world's majority of battery standard: CCA, DIN, EN, IEC, SAE, JIS, GB.

3. Technical Specifications

Voltage Measure Range	6V ~ 30V
Current Measure Range	4AH ~ 240AH
Special Test Clip	Double conductance Kelvin clamp
Housing Material	Acid-resistant ABS plastic
Working Environment Temp.	-20°C-50°C
Dimensions	25.4 x 25.4 x 25.4 cm
Weight	420g
