

Paper Pot Press Instructions

1. Take a strip of paper approximately 15cm wide and 40cm long. Fold approximately 4cm over to create a thicker wall for the pot.
2. Roll the paper around the handle, leaving about 3-4cm extending beyond the bottom.
3. Tuck the overhanging paper into the bottom of the handle to create the base of the pot.
4. Place the handle onto the base and twist a few times
5. Remove the finished pot from the handle. Place it on a tray and fill with seed raising mix and plant your seed.

Tips:

- ✿ The smaller format newspapers are perfect for making paper pots, simply split the pages lengthways to make 4 strips from a double page spread.
- ✿ The pots should stay together without having to secure them, however a bow of jute twine (make sure it is biodegradable) can help hold them together and make seedlings a cute gift- especially when the paper is so gorgeous.

Enjoy
