# WELCOME TO FINISHERS DEPOT

Delivering What Others Don't

Welcome to our latest company catalog, a comprehensive guide designed to showcase our extensive range of industrial finishing solutions. At Finishers Depot, we are more than just a distributor; we are your partner in achieving unparalleled finishing results. Our commitment to excellence is reflected in our carefully curated selection of products, including high-performance industrial coatings, innovative specialty coatings, premium abrasives, and essential shop supplies.

Understanding that each client comes with unique requirements, we believe there is no "one size fits all" approach in the world of industrial finishing. This philosophy drives us to work closely with you, our valued customer, to identify and tailor solutions that not only meet but exceed your expectations. Whether you are tackling complex challenges or seeking to enhance efficiency and aesthetics, our team is dedicated to providing the expertise and support you need to succeed.

We take particular pride in our unmatched ability to match colors. Our "Accurate Color or It's Free" guarantee stands as a testament to this skill, ensuring you receive precisely the right hue for your project, every time. This unique service underscores our commitment to delivering perfection and satisfaction in every product and service we offer.

As you explore this catalog, remember that our relationship with you goes beyond mere transactions. We are here to collaborate, innovate, and find the solutions that best fit your specific needs. Together, let's achieve outstanding results and set new standards in industrial finishing.

Welcome to Finishers Depot, where your vision and our expertise converge to create excellence.

## ABOUT US

For nearly 40 years, Wood Finishers Depot has been a trusted name for top-quality products, great service, and expert advice. We really care about putting our customers first. We offer the best finishing and touch-up products out there, all of which we've carefully checked and tested ourselves. We're proud to back them up.

What makes us different is how we focus on solutions. You get access to the top experts, training opportunities, and a dedicated customer experience team. This all adds up to a smooth experience that helps you succeed.

When you choose us, you're not just buying products. You're getting a partner who's all in on helping you meet your goals.

## THE FINISHERS DEPOT ADVANTAGE

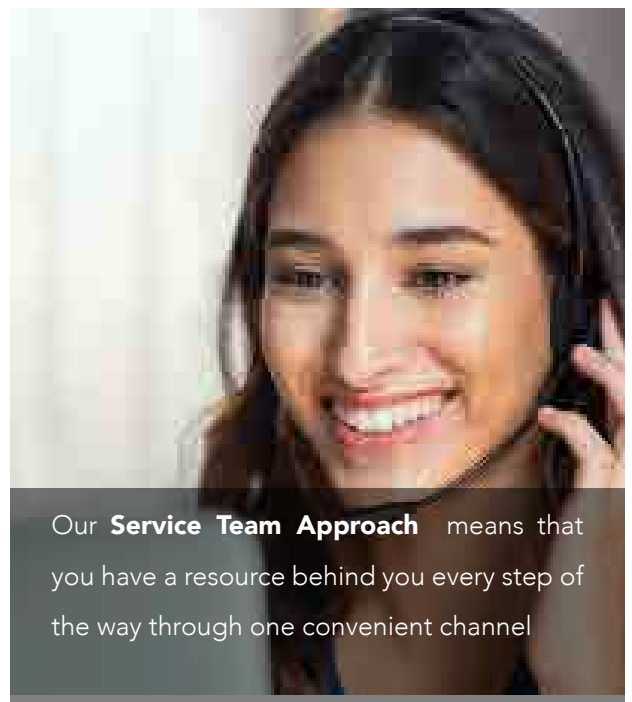

**SOLUTIONS BY EXPERTS**  
We believe in partnering with our clients to find solutions through our consultative sales process which includes a technical meeting and testing. Ultimately, our goal is to ensure your success

**TESTED & TRUSTED PRODUCTS**  
We only support trusted products, we've done all the research and tests so you know that what we offer is the best in the industry

**EASY TO DO BUSINESS WITH**  
We value your time – so we devised a system where Client Care can help you with every aspect of our partnership to ensure your success

Our **Service Team Approach** means that you have a resource behind you every step of the way through one convenient channel

**Ultraguard Conversion Varnish**

Ultraguard Conversion Varnishes offer a superior finish that handles moisture and other high traffic areas. Ultraguard is suited for interior wood surfaces such as kitchen cabinets, tables, office furniture and other wood fixtures.

**Ready and Easy to Use:**

- Ready to spray (after catalyzed)
- High solids
- Superior scratch and mar resistance
- Superior chemical and moisture resistance
- Excellent clarity
- Easy to sand
- Enhanced UV protection
- Easy to use and apply with excellent flow & build

**All the Benefits You Need:**

- Self-seal system or may be used with a companion sealer when desired
- Can be applied by conventional airspray, HVLP, airless or air-assisted airless equipment
- Surpasses all KCMA performance standards when applied properly
- HAPs compliant

**Perfect For:**

- Kitchen and bathroom cabinets, office furniture, architectural millwork and store fixtures

Superior durability, UV protection and a silky smooth feel.

Fast drying and seriously durable, Amarium Pre-Catalyzed Lacquer Systems are premium-quality finishes known for their ease of use. They also offer excellent clarity and provide for enhanced UV protection.

**Ready and Easy to Use:**

- Premium single-component finish
- Ready to spray, no catalyst required
- Fast drying
- Excellent clarity
- Easy to use/apply with excellent flow & build properties
- Excellent mar, water, solvent & general chemical resistance
- Easy to sand with excellent re-coatability

**All the Benefits You Need:**

- Complete self-seal system or may be used with a companion sealer, where desired
- Good durability
- Can be applied by conventional airspray, HVLP airless or air-assisted airless equipment
- Surpasses all KCMA performance standards when applied properly

**Perfect For:**

- All general interior wood finishing
- Kitchen cabinets, tables, furniture and other interior wood surfaces where a durable and easy-to-use finish is the end goal.

Amarium Precatalyzed Lacquer Systems are available in two performance levels.

Better Durability

UV Protection

The Amarium Professional Base coat is a premium vinyl base coat that provides a “color on color” primer to reduce a step. A unique product for solid color finishes, especially those that are distressed or glazed.

**Ready and Easy to Use:**

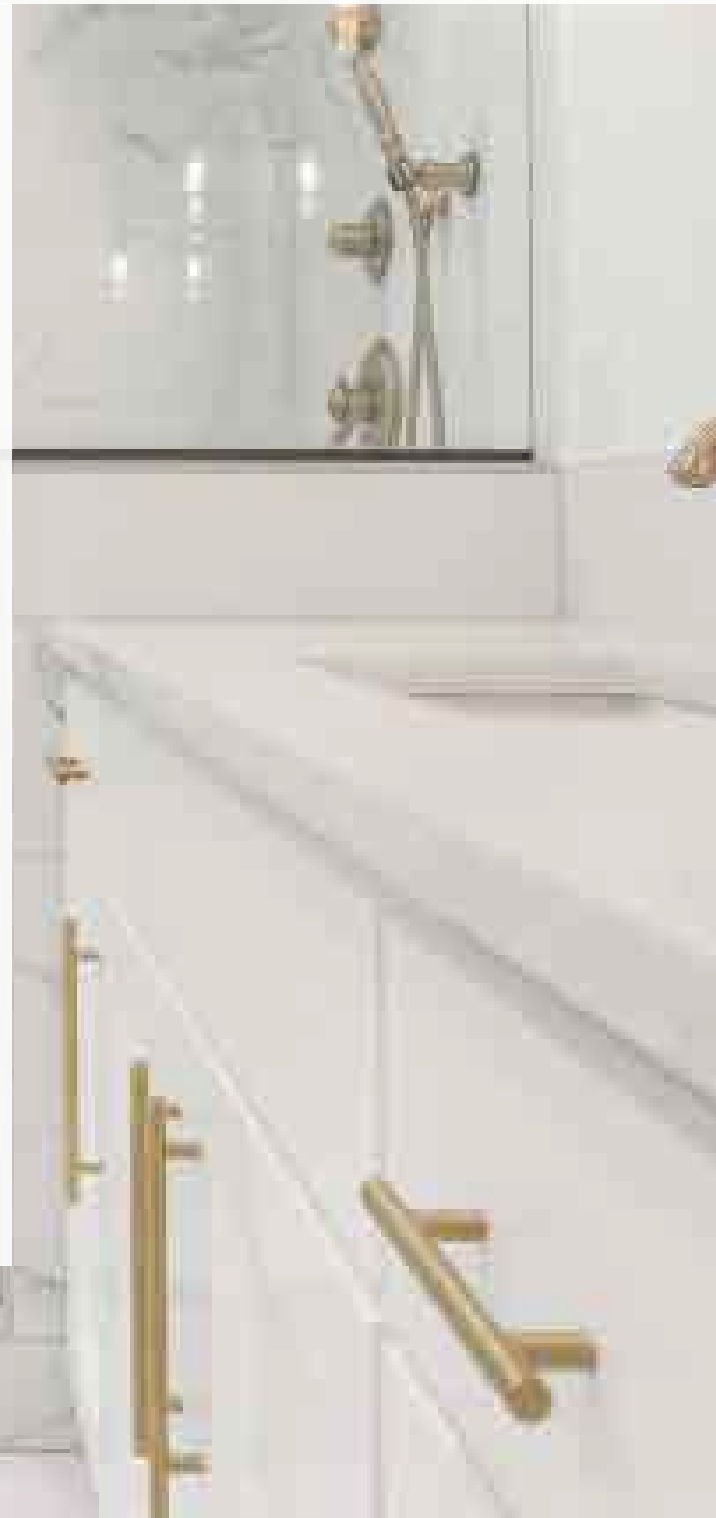

- Ready to spray, no catalyst required
- Fast drying
- Easy to apply with excellent flow & build
- Excellent mar, water, solvent & general chemical resistance
- Easy to sand with excellent re-coatability

**All the Benefits You Need:**

- Much more than just a primer, provides color on color - no more white primers to hide
- Better resistance to cracking from structural movement
- Has “tight to wood” look and feel
- Strength controlled in white and clear bases to ensure consistent color every time.

**Perfect For:**

- All solid color interior wood finishing
- Kitchen cabinets, tables, furniture and other interior wood surfaces where an extra-durable and easy-to-use finish is the end goal.

Superior durability, UV protection and a silky smooth feel.

**Zenith Waterborne**

Zenith is easy to apply and has outstanding flow and leveling characteristics, as well as exceptional clarity. Extremely durable with excellent household chemical resistance, and will pass all Kitchen Cabinet Manufacturers Association (KCMA) coatings performance requirements when properly applied and cured.

**Ready and Easy to Use:**

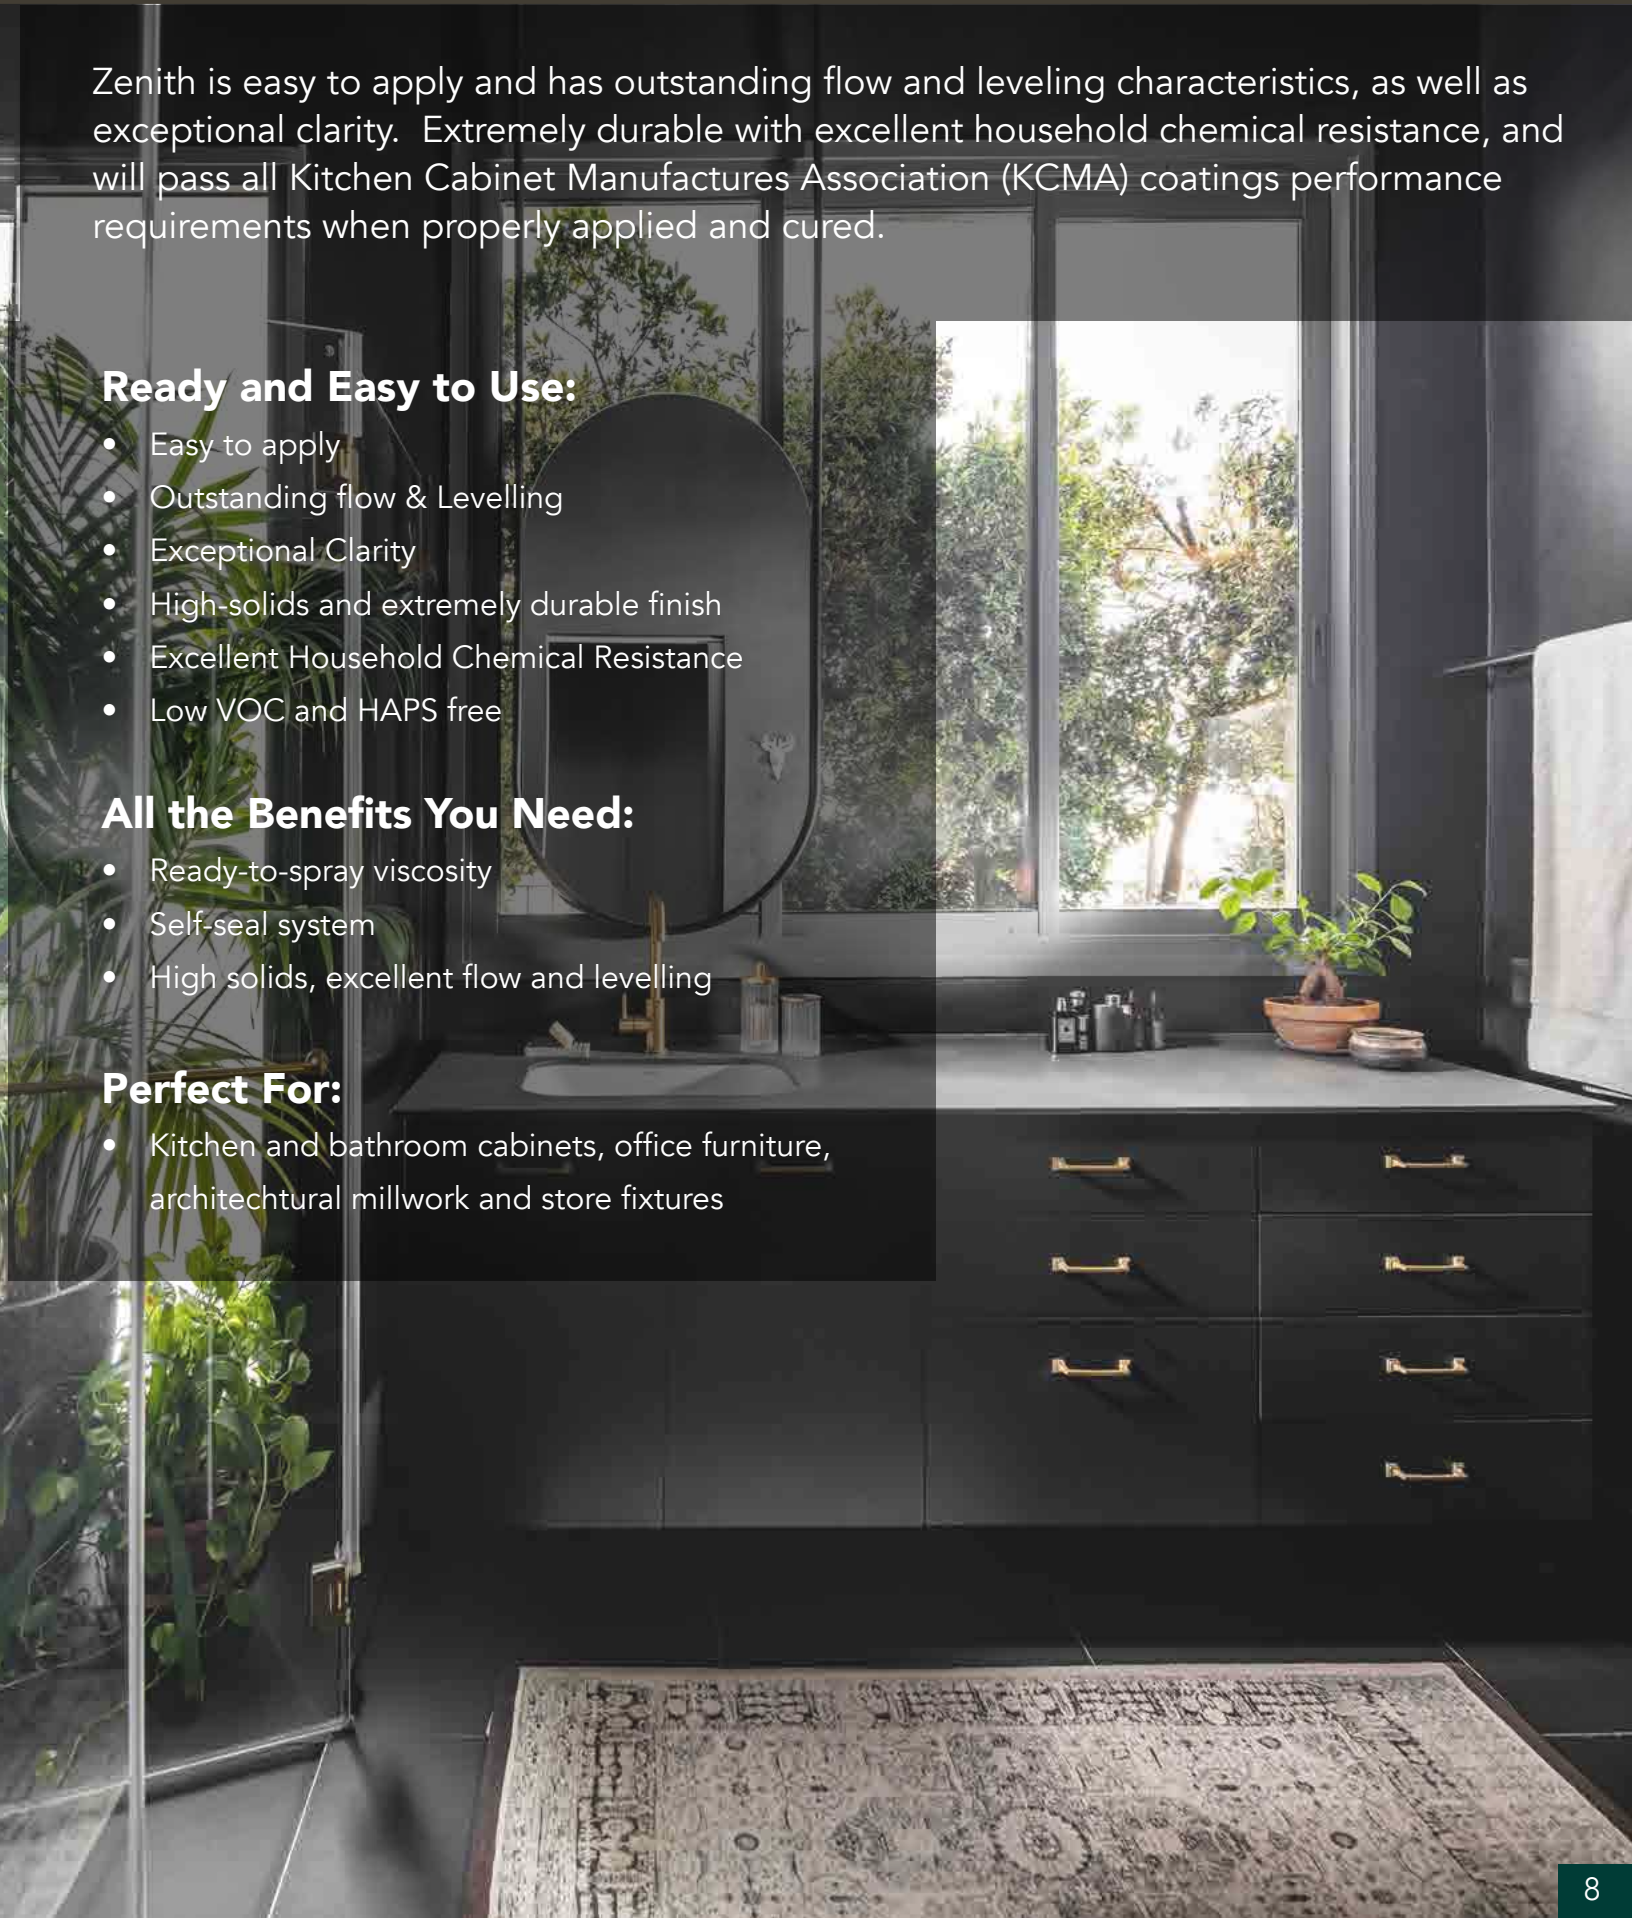

- Easy to apply
- Outstanding flow & Levelling
- Exceptional Clarity
- High-solids and extremely durable finish
- Excellent Household Chemical Resistance
- Low VOC and HAPS free

**All the Benefits You Need:**

- Ready-to-spray viscosity
- Self-seal system
- High solids, excellent flow and levelling

**Perfect For:**

- Kitchen and bathroom cabinets, office furniture, architectural millwork and store fixtures

Superior durability, UV protection and a silky smooth feel.

Good Durability

Premium Color System brings out the natural richness of wood. These special formulations highlight and enhance all types of wood. Ideal for cabinets, tables, furniture and other interior wood surfaces where delicious color development is desired. They may be finished with any approved wood finishes, sealers or self sealing topcoat systems.

### Ready and Easy to Use:

- Intense rich color
- Outstanding uniformity of color
- HAPs compliant

### All the Benefits You Need:

- Compatible with Wood Finishes, sealers and self-sealing topcoat systems
- Unlimited color options available through 100s of colors from our wall of color displays
- Excellent for all wood types
- Professional-grade colorants and dye concentrates for superior clarity and color development

### Perfect For:

- All general interior wood finishing
- Cabinets, tables, furniture and other interior wood surfaces where delicious color development is your goal

## PRODUCTION SPRAY STAIN BASE

Spray - No Wipe stains are specially formulated for production environments. Ideal for cabinets and millwork applications or anywhere fast, consistent color application is desired in a fast paced production environment. Our production spray stains can be formulated to achieve a near hand wiped look or an even monotone color - minimizing wood variation - in one pass. Our production spray stains can be top coated in 15-30 mins depending on application - all with no wiping labor or rag disposal! Available in a water and solvent versions.

### All the Benefits You Need:

- Spray No-wipe
- Fast & Consistent
- Near-Hand-Wipe Look

**Fast Dry, Super Durable European Technology Products For Your Operations.**

ICA polyurethanes are world renowned for giving a truly top class finish. Whether looking for mirror-like high gloss, dead flat matt or anything in between, ICA polyurethanes can give you what you and your most demanding clients dream of with less expense and effort than you probably realize. Due to its versatility, ICA polyurethanes can be used anywhere the beautification and protection of wood is paramount. Polyurethane lends itself especially to applications where a durable, resistant and stable finish is required, such as office, public building and kitchen furniture.

**In Stock and Easy to Use:**

- Premium durability
- Fast drying
- Easy to apply
- Custom colors available

ICA polyurethanes are typically applied by conventional spray and do especially well when applied with our Kremlin Spraying systems.

**Polyesters**

Designed for full fill, closed pore finishing, ICA has the full range of products. Extremely easy to sand and yet with almost no shrinkage even in the long term.

Polyesters have a significant learning curve and a very short pot life, but when used correctly are the ultimate way to a “closed pore” finish. ICA Polyesters can be top coated with our Polyurethane systems and many other conventional top coats. Great for flat and shaped panels, doors, pianos, coffins, etc. CAUTION: These products require three components and should be used exactly to manufactures specifications.

**Isolante Barrier Coat**

Isolante barrier coat provides isolating properties for exotic woods and improves substrate wetting. It is typically used after stain and before sealing coats. It also must be used with polyester topcoats to prevent curing inhibition caused by some dyes and impurities found in MDF board. Conventionally applied by spray.

Description	Gallon	Catalyst
ICA Polyester Barrier Coat	IC-IS203-1	C204 @ 100%
ICA Catalyst for IS203 Bi-Component Isolator	IC-C204-1	-

- Cabinets, tables, furniture and other interior wood surfaces where delicious color development is your goal

## GRAINTONE PLUS GLAZE BASES

The Graintone Plus Glaze Bases are designed for application over an approved wash coat, sealer, or self-seal topcoat to add depth, color, and character to a finish. Most high end custom finishes utilize glazes for creating decorative effects, such as highlighting profiles, adding distress or depth to the final schedule. Graintone Plus Glaze bases are used in all interior wood finishing such as furniture, molding, doors millwork and cabinetry.

Graintone Plus Glaze Base is a traditional glaze base and allows long open times for adequate manipulation. Dry times will vary depending on application, temperature, humidity, and tint load. Generally light applications will be dry in 1-2 hours, medium application 2-4 hours, and heavy applications from 4-8 hours.

Graintone Plus Conversion Varnish Glaze Base is a production glaze base designed to work exclusively with post catalyzed finishing systems such as our Ultraguard Conversion Varnish. Dry times will vary depending on application, temperature, humidity, and tint load. Generally light applications will be dry in 1 hour, medium application 1-2 hours, and heavy applications from 2-4 hours. When used over Ultraguard sealer, clear or white topcoats do not let dry longer than 8 hours before re-coating or loss of adhesion may occur.

## ZENITH WATERBORNE POWDER GLAZE

Fast drying, very little odor, and cleans up with water. Zenith Powder Glaze Base is a unique glazing product used for creating antique looks and other special effects. Like traditional glaze it is designed to be applied over a sealed and sanded surface, but the Zenith Powder Glaze must be spray applied and then either wiped off while still wet, or removed with a synthetic Mirlon pad (or similar) after the glaze has quickly dried to a powder. Dries to a powder in 10-20 minutes with normal airflow. This glaze can be topcoated in 30 minutes or whenever it has fully dried to powder form. Zenith Powder Glaze must be top coated.

Zenith Waterborne Powder Glaze Clear Base	VL-VWS4700-1

### Glaze Inking Bottles

4 ounce Glaze "inking" bottles have unique LL style locking lid enclosure for attaching metal "inking" needle.

### Glaze Inking Gun

The best way to apply glaze in the "ink" style is with a gravity fed inking gun. These are modified air brush guns used to apply pin striping & can place glaze in the grooves cleanly without needing to wipe.

### Glaze Inking Needles

1" blunted "inking" needles that lock onto lid enclosure. 16 gauge. Box of 50.

Super Penetrating NGR Stains are specifically formulated to provide the ultimate transparency in a versatile color selection. Specifically formulated to be utilized in a variety of applications; as a foundation color for dark transparent colors, as a spray on stain as a dye for tinting lacquer or sealer.

### **Ready and Easy to Use:**

- Intense rich color
- Outstanding uniformity of color
- HAPs compliant

### **All the Benefits You Need:**

- Application
- Excellent Penetration
- Superior Transparency & Clarity
- Fast Drying Spray Stain
- May be added to many clear finish products
- to achieve a variety of results
- Ready to use formulas

### **Perfect For:**

- All general interior wood finishing
- Cabinets, tables, furniture and other interior wood surfaces where delicious color development is your goal

## Common Solvents for Lacquer & Conversion Varnishes (fastest to slowest)

Description/NGR	Description	Gallon	5 / Gallon	55 / Drum
Acetone	A strong fast evaporating solvent. Often used for clean-up, to increase dry times for certain systems and as a solvent for epoxies.	LT501-1	LT501-5	LT501-55
MEK	A fast drying solvent, Methyl Ethyl Ketone is a good choice for thinning specified coatings, including polyester, epoxy resins, and adhesives. This versatile solvent can also be used for cleaning up dried latex paint, lacquer and adhesives.		LT43-5	
N Butyl Acetate	This is a great solvent for precatalyzed lacquers and conversion varnishes. Will help the flow-out and retard the dry times with very little reduction of solids.	LT41-1	LT41-5	
MAK	This is a great solvent for lacquer finishes. Works well as a leveling and flow additive. Use liberally or increased performance. Caution: Has a strong odor!	LT42-1	LT42-5	
Utility Lacquer Thinner	An economical blend of solvents that is appropriate for clean-up and general solvent use. It may be used to reduce some coatings but is not recommended for hot weather or humid spraying conditions.		LT200-5	LT200-55
Premium Lacquer Thinner	Our high quality premium grade lacquer thinner is a time proven product specifically formulated for our finishing products. Thinner is highly recommended for all conditions, including wet humid and/or hot and dry spraying conditions. Our Premium Lacquer Thinner helps promote leveling and decreases over-spray problems.	LT300-1	LT300-5	LT300-55
Super Retarder	Our slowest solvent will help eliminate blushing and increase flow-out! This Super Concentrated Retarder helps your finish perform correctly in all types of weather & other uncontrollable conditions.	LR100	LR100-5	

## Common Solvents for Finishing (fastest to slowest)

Description/NGR	Description	Gallon	5 / Gallon
Denatured Alcohol	Thins shellac and some types of inks. A common solvent used in the wood finishing trades for years.		LT504-5
VM&P Naptha	Considered a fast dry alternative to paint thinner. Used often to mix oil stains and thinning oil based paste wood fillers.	LT506-1	LT506-5
Paint Thinner	Used for thinning all types of oil-based paints, enamels and varnishes. Also works well as an inexpensive after wash filler for remover clean-up. Use whenever paint thinner or mineral spirits are called for.		LT500-5

### Denatured Alcohol

Thins shellac and some types of inks. A common solvent used in the wood finishing trades for years.

Stock#	Description
LT504-5	5 Gallon Can

### Paint Thinner

Used for thinning all types of oil-based paints, enamels and varnishes. Also works well as an inexpensive after wash filler for remover clean-up. Use whenever paint thinner or mineral spirits are called for.

Stock#	Description
LT500-5	5 Gallon Can

### Liquid Paint & Varnish Remover

R36 Industrial Paint & Varnish Remover is a commercial strength, liquid remover that is highly recommended for any commercial strip shop. Works great on paint and hard to strip pieces. Excellent for flow-pump or tank stripping. Low evaporation rate. Water or solvent washable. This is the remover that we use on a daily basis in our commercial shop.

Stock#	Description
R36-5	5 Gallon Can
R36-55	55 Gallon Drum

### Semi Paste Remover

Thick, semi-paste consistency makes it a great choice for hand stripping items. An easy, effective remover for most any stripping job. R21 semi paste remover works great on most paints. Low evaporation rate makes it perfect for hard to strip pieces. Thick consistency allows the remover to stay where you put it and not run!

Stock#	Description
R21-5	5 Gallon Can

### Alcohol Remover

Water thin remover that dissolves most clear finishes without affecting the patina or wood color. Designed to work in a tank, but will work well as a mild hand stripper. R18 has an alcohol base; thus it is flammable and has an evaporation rate. This is a very gentle remover that can be wiped dry and ready for finishing after 45 minutes

Stock#	Description
R18-5	5 Gallon Can

**The Sames Kremlin Airmix® Pump System provides exceptional Performance, quality of finish and a high transfer efficiency.**

Comes complete with 25' air & fluid hoses, X-Cite gun with 09/114 tip sets for fine finishing.

- Constant, pulse free delivery for superior finish
- Fluid section designed to handle a wide range of viscosities
- Reduce paint & solvent waste
- Low air consumption Reliable air motor with 45% fewer part vs competitors
- Closed construction with no risk of injuries. Kremlin Xcite Spray Gun - Tip 09.114, 120
- Bar w/Aircap. The Xcite™ Airmix® manual spray gun delivers outstanding performance with unsurpassed finish quality for a quick payback. The Xcite™ is HVLP compliant.

Sames Kremlin Airmix® Manual Spray Gun

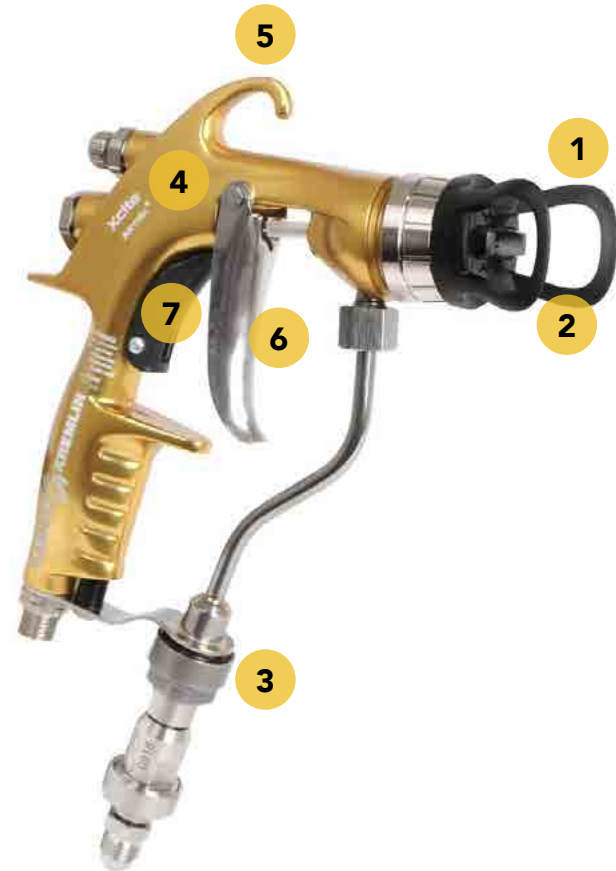

The Xcite™ Airmix® manual paint spray gun delivers outstanding performance with unsurpassed finish quality for a quick payback and is HVLP paint sprayer compliant. It features an anodized body with laser engraving not affected by exposure to solvents. The construction built to last and compatible with all types of materials (even water-based with stainless steel fluid passage and Rulon® sealing)

**Technology**

Since 1975, Airmix® combines conventional and high pressure Airless® technologies advantages. It is today's industry standard for medium pressure atomization.

1. Large tip selection with dedicated X-tra™ Fine Finish tips for water-based material with wide choice of flow rates and fan width patterns.
2. Unsurpassed finishing quality and outstanding transfer efficiency with VX24 HVLP aircap. EZ Adjust Aircap to facilitate the rotation of the head from horizontal to vertical spray
3. Fluid inlet with or without swivel fitting for low torque effort minimizing operator fatigue. Featurebuilt in filter screens built-in filter with high filtration capacity to avoid tip blockage and minimize pressure loss
4. Light paint gun and ergonomic design for comfortable fit and feel
5. Built-in hook to keep the paint gun near the workstation
6. Ergonomic paint gun trigger pull with minimal force
7. Increased operator safety with trigger lock and aircap protection

Kremlin's SFlow airless manual spray gun generates real material savings, especially on spray - no wipe industrial stains. It's reliable and solid construction partnered with a comfortable grip making finishing easier. The SFlow gun works great with most of our Kremlin pump systems by attaching the SFlow gun and turn off atomizing air for true airless spraying!

1. Reliable & repeatable spraying quality: high-end tungsten carbide tip tested
2. Fatigue-free, (2) or (4) finger trigger to fit every painters' needs
3. Embedded patented dedicated tool for quick filter changes. Large filtration hand filter area: available in PA or stainless steel to prevent any tip plugging. Material flow from inside to outside of the filter for easier maintenance.
4. Ergonomic design with comfortable grip to prevent any RSI.
5. Built-in hook allows you to keep the gun near the work station
6. Swivel fitting for better maneuverability
7. Smart lock: quick & easy tip orientation and positioning
8. Large choice of flat, Skill™ or reversible tips to meet your requirements. Enhanced security: Trigger lock, tip lock, and hand safety protection
9. Patented trigger guard: acts as a wrench, a filter extractor and helps to remove trigger

AK000-301-213	Kremlin SFlow Airless Gun, SKILL Tip ,12/13

**FPRO P Airspray Manual Spray Gun**

Kremlin's FPro series represent the professional grade Airspray guns for the wood industry. FPro Airspray guns feature patented innovative restrictor controls that pre-atomize the coating into smaller droplets, thus slowing down the travel speed and leaving time for the air cap to atomize the perfect coating droplet size. This avoids excessive bounce back and increases transfer efficiency. Additionally, the patented Vortex spin effect lets the coating achieve i-shaped parts like raised panel edges and corners.

Both patented technologies work to improve overall transfer efficiency and achieve better finish quality. FPro series Airspray are designed to be easy to use and well suited to apply water-based or solvent-based coatings. They can be configured to match your needs.

1. The FPro P spray gun gives the perfect finishing available for all painters. The widest range of spray guns and accessories for all applications in markets that require high finishing spraying.
2. Patent pending restrictor paint speed controller and patent pending Vortex spin effect delivers a perfect atomization with very high transfer efficiency (up to 78% in HVLP).
3. Three atomization and aircap technologies: Conventional, LVLP and HVLP available versions.
4. Three different adjustment knobs to get the perfect spray pattern in every condition
5. EZ Adjust Aircap to facilitate the rotation of the head from horizontal to vertical spray
6. Fluid inlet with or without swivel fitting for low torque effort minimizing operator fatigue. Feature built in filter screens built-in filter with high filtration capacity to avoid tip blockage and minimize pressure loss
7. Light paint gun and ergonomic design for comfortable fit and feel
8. Built-in hook to keep the paint gun near the workstation
9. Ergonomic paint gun trigger pull with minimal force

Kremlin’s FStart series provides an economical Airspray gun cost, but with a comfortable and ergonomic design all built into a lifetime gun body. This is not only a high quality spray gun, but it is also one of the lightest weight spray guns in its class. Designed to be easy to use and provide a high-quality finish. FStart Airspray guns are well suited to apply water-based or solvent-based coatings and can be configured to match your needs.

1. Fine adjustments to achieve the perfect spray pattern for all applications
2. Soft springs for a responsive and reduced trigger pull
3. New trigger design for more comfort
4. One of the lightest manual spray guns in its category ensuring a reduction of carpal tunnel injuries
5. Aluminum body for easy cleaning

Kremlin's Smart Cups make mixing and spraying a real pleasure while simplifying the cleaning and conservation of coatings & stains. No need to transfer your products into different containers - use the same liner to mix, apply, store/dispose all without splashing. Developed for frequent color changes, the Smart Cups solution reduces cleaning time and solvent usage.

The disposable Smart Cup attachment system allows use in any position without the risk of dripping, all while improving productivity and quality!

1. Built-in filter with 190µm & conical design to improve flow rate and reduce dead zones
2. The liner collapses evenly while spraying for stable fluid delivery: It is possible to spray in all directions and to check the paint level
3. Spherical bottom creates vortex when stirring for proper paint mixing
4. Selection of ultra-light adapters with a perforating tool inside the adapter: paint flows only when the cup is on the gun
5. Fast locking system with only 2 clips
6. Unitized lid and liner assembly: eliminate the hazard of coming apart during disposal
7. Sealing plug to protect the paint for later use
8. Lid and ring dispenser
9. Cup dispenser

#### Terms & Conditions

1. All checks performed on site. Our service tech will come to perform the work onsite.
2. An added trip charge of \$50 for service outside 30 miles radius from 4551 E. Richie Road Humble, Tx 77338 location.
3. The fee listed is a 1-time cost billed annually. The listed prices cover the first 3 pumps.
4. Program price includes 3 pumps. Add \$50 for each additional pump.
5. If offsite repairs are needed, we will provide a loaner pump.
6. Loaner pumps are available if needed for Premium and Pro plans.

Contact us today - we'll provide you with a prompt service estimate and prompt turn around on your spray Kremlin equipment.

### MIRKA Pneumatic Sanders

Mirka’s finishing sanders are constructed of precision molded composites for strength and durability, while reducing operator fatigue. This construction also reduces sound for increased comfort.

- True 12,000 rpm performance - for maximum productivity
- Each model is counter-balanced for its specific size backup pad
- Features moisture-resistant composite rotors, and premium counterweight bearings for long life and superior reliability
- Finishing Sanders can be used with vacuum operation with the addition of a conversion kit

Technical Specifications		Stock#	Description
RPM	12,000	SPMR5	5" Pneumatic Sander
Type	Pneumatic		
Color	Yellow & Black		
Pad Size	5" Vinyl or Grip Back		

### Backup Pads - Vinyl & Grip Backed

Mirka’s backup pads are manufactured using top quality molded polymer construction. Each pad is balanced to eliminate vibration and provide superior finishing. The medium density polyurethane foam is firm enough to level substrates, while conforming to minor surface contours. Pads have a maximum operating speed of 12,000 RPM. Regular and heavy-duty vinyl faces are available for use with PSA discs, and a grip face is available for discs using a hook-and-loop attachment method. The specially treated vinyl pad face offers excellent adhesion and ease of removal without paper delamination or tearing. The grip face has durable nylon hooks for use with fabric loop-backed disks.

## Mirlon Pads - 18 Series

Developed using Mirka's innovative Total Coating™ Technology, Mirlon Total is more aggressive than Mirlon and produces a dense scratch pattern and rapid result. Suitable for use in wet and dry modes, it features an open and flexible structure and strengthened to make it strong and long-lasting.

- New open design is thinner and more flexible than original Mirlon
- Three dimensional structure made with cut fiber strands; coated with resin & abrasive
- Consistent coating of aluminum oxide (VF 360) and silicon carbide (UF 1500, MF 2500) abrasive grains provide uniform, dense scratch pattern
- Very flexible product ideal for use on contoured surfaces
- Manufactured by Mirka using latest technology for superior quality & performance

Stock#	Description	Grit	Pack	Case Qty
SP18-118-447	4-1/2" X 9" Pads	Very Fine	25 Pads	4
SP18-118-448	4-1/2" X 9" Pads	Ultra Fine	25 Pads	4

## Goldflex Soft Rolls

The soft and flexible Goldflex Soft has been developed for sanding profiled surfaces and irregular, difficult-to-reach details by hand. The Softflex 4 mm foam base is grip friendly and applies pressure evenly, which reduces the risk of sanding through the surface. The special aluminum oxide stearate coating prevents clogging.

- Suitable for both dry and wet sanding
- The finer grits are suitable for primed or lacquered sanding surfaces
- Delivered in a user-friendly dispenser box

Stock#	Description	Grit	Case Qty
SP23-145-150	200 Soft Pads Roll	150	5
SP23-145-180	200 Soft Pads Roll	180	5
SP23-145-240	200 Soft Pads Roll	240	5
SP23-145-320	200 Soft Pads Roll	320	5

## Mirka Gold - 23 Series

- Durable aluminum oxide grain delivers a fast and long lasting cut.
- Proprietary backing is stronger than other competitive brands using a traditional backing.
- High strength resin bonding for superior grain support.
- A special stearate coating is used to maximize resistance to clogging and loading.
- A uniform, semi open coat design produces an even, consistent scratch pattern.

### Multifit Gold Disks

- One hole pattern fits all tools
- Fast disk replacements
- More holes - better dust extraction

Stock#	Description	Grit Range	Pack	Case Qty
SP23-612-***	5" Grip Back	80 - 320 (no 180 grit)	50 Disks	10
SP23-5MF-***	5" Multifit Discs (Works on all hole patterns)	80 - 320	50 Disks	10

### Four Sided Sanding Sponges

A 1" thick sanding sponge with abrasive coating on all four sides! These firm sponges are very versatile and work great for ordinary block sanding. The extra thick block make them ideal for conforming to wood contours and profiles by hand. Packs of 10.

Stock#	Description	Grit	Package	Case Qty
SP1353-150	2-3/4" X 4" X 1", 100 per Box	150	10	10
SP1353-220	2-3/4" X 4" X 1", 100 per Box	220	10	10

### Double Sided Sanding Sponges

1/2" thick foam backing on this pad makes it flexible, very versatile and soft. Features abrasive coating on two sides, this sanding pad is very popular for all types of wood sanding. 220 grits may be used for finish scuff sanding.

Stock#	Description	Grit Range	Package
SP1353-150B	2-3/4" X 4" X 1", 100 per Box	150	10

### Steel Wool Pads

Extra-fine, long fibered pads High quality, long fibered pads for any shop where grease and oil-free steel wool is needed. 16 pads per sleeve.

Stock#	Description	Package
SW4	#0000 Steel Wool Pads	16 Pads
SW2	#2 Steel Wool Pads	16 Pads

### Carat Flex - 02 Series 9"X11" Sheets

Carat Flex is a sterated coated abrasive product suitable for dry sanding applications such as scuff sanding sealers and top coats. Silicon carbide grain provides a sharp cut with a uniform scratch pattern Carat Flex has been developed especially for hand sanding of sealers and other wood finishes. Backing is a flexible, latex impregnated paper which is ideal for profile sanding Coating does not release from paper due to extremely good resin bonding. A special sterate coating is used to maximize resistance to clogging and loading.

## Autonet Disks - AE Series

**Lasts up to 5X longer than traditional sanding disks! Eliminates Clogging and Pilling**

Autonet is the fast, efficient and cost effective abrasive technology that revolutionizes the sanding process! No matter if your sanding wood shutters, wood cabinets or any type of wood part Autonet will sand longer and provide a cleaner environment if vacuum sanding! We participated in numerous case studies with customers and they have all received from three to even ten times the sanding life of the Autonet disks versus any other paper backed hole paper. If you want to save time and money in your sanding operation try Autonet - It's fantastic!

## Blush Eliminator

Eliminates white haze or moisture trapped under finish Humidity, cold weather and fast-drying lacquers are all culprits in causing blush, that annoying white haze caused by moisture trapped under the finish. A quick misting and blush disappears! Re-flows the finish, allows trapped moisture to escape. Quick Blush Eliminator dries quickly, allowing maximum repair speed. Super Blush Eliminator is a slow-drying, leveling solvent...use to remove blushing or level overspray.

Stock#	Description	Case
LA101	Quick Blush	12
LA100	Super Blush	12

## Wax Remover & Furniture Cleaner

Easily wipes away the halos left behind from wax stick or Installer's Putty applications. Our Wax Remover Aerosol also works great before starting any touch-up job as a cleaner, and degreaser. Dissolves layers of dirt, grime, grease, smoke, old wax, polish buildup, fingerprints, etc. Simply spray on a clean soft cloth and wipe your repair area.

Stock#	Description	Case
LA800	Wax Remover Aerosol	12
