A2 Vacuum Table

The A2 Vacuum Table is a freestanding screen printing table with a vacuum bed size of 594 x 420mm.

Description

The A2 Vacuum Printing Table is a freestanding unit with adjustable leveling feet. The working surface is manufactured from high quality, melamine faced board, with a perforated top surface and sandwich construction to allow vacuum to be used for workpiece holding.

A vacuum unit is supplied with the machine, and this is attached to the stand shelf.

There is a hinged frame for screen holding, with height adjustment at both front and rear to provide a fully adjustable snap distance from screen to substrate. The frame has sliding screen mounting channels which allow screens of different shapes, sizes and thicknesses to be used.

The frame has an adjustable balance weight so that it lifts easily with any type of screen, and the movement of the frame also controls the vacuum to the table, automatically disconnecting it when the frame is raised.

There are controls underneath the table to switch the vacuum and also to adjust the lifting angle of the frame for ease of operation.

Specifications

Voltage	230V 50-60Hz	
Max Current	2 Amps	
Vacuum Table Size	594 x 420mm	23.5 x 16.5in
Maximum Screen Size	786 x 604mm	31 x 23.75in
Dimensions	840 x 1070 x 900mm	33 x 43 x 35in
Weight	52kg	115lb
