## FIX-CAB

### FIXING ACCESSORY

For float and tilt level switches

The cable tie is an inexpensive and often overlooked accessory in installations. Its use is strongly recommended for the fixing of all suspended devices in order to avoid the deterioration of the outer sheath of the electric cables.

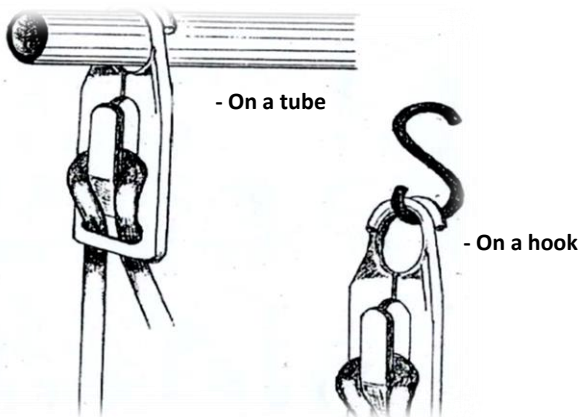

Easy to mount, the cable tie is used to properly secure the power cable to the desired height and allows precise adjustment at any time.

**Important specification**      Avoids the deterioration of the cable

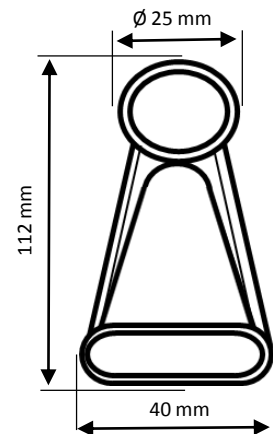

**Maximum temperature**      85°C

**Housing**                              Polyamide

**Weight**                                25 g
