

# Easy Opener®

The Easy Opener® belongs to the assembly group of special tools and is the ideal DIY tool for gently opening sensitive clip-on components without damaging adjacent sensitive surfaces.

The Easy Opener is a special tool for the gentle disassembly of sensitive components and for working on clipped housings. The Easy Opener is produced entirely in Germany and is made from fibreglas-reinforced polyamide. This material is flexible and stable at the same time, which makes the tool perfect for different applications, e.g. for loosening switches, luminaires or similar components.

With this tool, housing components can be opened without scratching sensitive materials. There are three lever surfaces with different material thicknesses available for this purpose.

**Technical Data**

|                      |  |
|----------------------|--|
| Range of application | material gentle opening without damaging adjacent surfaces |
| Lifting surface      | three lever surfaces with different material thicknesses   |
| Material             | glass-fibre reinforced polyamide                           |
| Length               | 180 mm   |
| Weight               | 22 g   |

**Note**  
Working with WEICON Stripping tools is only permitted with potential free wires and conductions.
