Surface pre-treatment

The surface to be treated must be clean, dry and free of grease (e.g. cleaning and degreasing with WEICON Surface Cleaner).

Processing

Apply sufficient Mould Release Agent Liquid F 1000 with a fibre-free pulp cloth, with a lint-free paper cloth or with a paint-brush on the surface and let it dry. When using new moulds repeat the process two to three times. After application let the Mould Release Agent evaporate for approx. 10 minutes until the surface is mat, dry and tack-free. Do not apply Mould Release Agent on absorbing or porous surfaces (if necessary use Mould Release Agent Wax P 500).

Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation. We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.
