

Flow switch Novafix PD-...MH

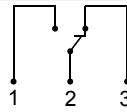

- Highly reproducible
- Insensitive to dirt
- Precise setting of the switching valve by means of rotation

Characteristics

Mechanical flow switch, for fluid media, with no-contact triggering of an adjustable Reed contact.
Robust construction in PVC material.

Handling and operation

- Include straight calming section of 5 x DN in inlet and outlet.
- If the media are dirty, install a filter (use magnetic filter for ferritic components).
- It must be ensured that the values given for voltage, current, and power are not exceeded.
- When switched on, a load must be connected in series.
- The electrical details apply to ohmic loads. Capacitive, inductive and lamp loads must be operated using a protective circuit.
- Remove the transport lock (white plastic screw in acrylic glass body) before commissioning. Then close the threaded hole with the sticker included in the scope of supply.
- Do not exceed permissible pressure depending on the temperature (see diagram)
